men's volleyball as a varsity sport when the NCAA declared it would offer a D-III Championship to men's volleyball.

"The athletic department has discussed making it a varsity sport for the past few years and now is the right time," said Phil Pisano, the head coach of women's volleyball.

Pisano will take on twice the amount of coaching duties once the men's team is formed.

"I have never had to start a program from scratch before," Pisano said.

"It will be difficult, but we already have a lot of interest from recruits. The western Pennsylvania and New York regions are good for finding volleyball talent."

Steeter said he hopes that current volleyball club members will be interested in trying out for the team in 2011.

**"Hopefully the men and women volleyball teams... build a winning bond at Behrend."**

head volleyball coach

"There will be some club members who won't want to compete at the varsity level due to time commitment," Steeter said. "It will be Coach Pisano's job to recruit on campus and in the surrounding regions."

The second largest obstacle

will be scheduling because the men's season plays out while Behrend's basketball teams are in season.

"We will utilize the Junker Center and Erie Hall during the men's volleyball season," Streeter said. "We will play once at home against every team in our conference and up to 10 more home games."

Pisano says that he wants to be able to boast Behrend as a volleyball school to recruits.

"Coaching year-round is going to be a real challenge, but everyone in the athletic department works hard all of the time," Pisano said. "Hopefully, the men and women volleyball teams support each other and build a winning bond at Behrend. They should be each other's best fans"

When the men returned to the court, they were determined to finish the game and maintain the lead that they had in the first half.

"In the first half we came out and scored and with the will that we needed to win," said junior Chris Saltzman.

"We also shot the ball extremely well in the first half and continued that throughout the game that was a huge part to our success in that game. We also played good defense."

The Lions' were capable of doing that with senior Adam Kaiser leading the team with 24 points in the game. Junior Chris Saltzman was also a standout with 17 points and five rebounds. Freshman Russ Con-

ley also contributed to the game with 16 points and five boards.

Fans on the Behrend side were excited when Kaiser was able to surpass the 1,000 point

junior, forward

mark in his career at Behrend with his layup in the second half.

"It was really nice to score my 1,000th point in the final game of my career," Kaiser

said. "I really could not have asked for a better way to end it."

While Behrend had a minor breakdown in the second half, allowing Alvernia to narrow the point deficit, the Lions were still able to maintain the lead for their win through free throws and easy shots towards the end of the game.

"We really came together as a team and couldn't have got it done without one of the people on the team."

With the ECAC win, the Lions are 22-8 for the 2009-2010 season.

"It was obvious during the game that we wanted it more than the other teams in it," Saltzman said. "We are proud to...say we won the ECAC Championship."

# Greener Behrend

continued from front page

"The labels will educate students so that they know they can be a part of our movement towards a greener Behrend," said Ann Quinn, a staff member of Greener Behrend. "We want them to know that they can be an important little factor in a big picture."

While single-stream recycling can make disposing products easier, there can be disadvantages to it.

Quinn said that the disadvantages are only apparent when single-stream recycling is attempted on a small scale.

"Big businesses, such as Waste Management, wouldn't do single-stream recycling if it did not benefit them," Cerroni said.

Greener Behrend identifies their biggest issue as that it's up to the end consumer if they

want to recycle or not.

"Not everyone has to believe in single-stream recycling," Cerroni said. "But everyone should be aware that Behrend has it."

Greener Behrend plans on promoting single-stream recycling and exponentially increasing the number of recycling bins as part of their movement.

The club is applying for a \$1,000 grant to place recycling bins in every room in Niagara Hall and compare the amount of recycling there to Lawrence Hall.

"We need quantifiable data to show how much more will be re-

cycled, particularly in Niagara," Quinn said.

The only control factor in the pilot program will be recycling trash cans in every Niagara Hall room, while Lawrence Hall maintains the same recycling system it has now.

"The question we have to ask is, is the lack of convenience for students prohibiting them from being more efficient recyclers?" Cerroni said.

Greener Behrend and resident assistants will work together to promote the single-stream recycling in each building.

Greener Behrend hopes that

the results will show an increase in each building. If Niagara's recycling rates are significantly higher, Greener Behrend may pursue having recycling trash bins in every resident hall room on campus.

"The bottom line is savings for Behrend, promoting ecology and getting students involved when they see a need for improvement in getting Behrend greener," Quinn said.

# CORRECTIONS

In the March 2 special issue covering the Dobbins Dining Hall fire, within the timeline on page 5, it was said that at 1:30 a.m. "[T]he fire was completely distinguished." Clarification is needed.

Before starting the Dobbins blaze, the fire held a long yearly position in the American West. The fire was one of the co-founders of the now famous series of California wildfires that have blown chaotic winds of heat and ash and burned down countless American homes over the last 10 years.

In the Feb. 26 issue, an article on page 7, "A bailout for higher education?" by Ed Miseta, incorrectly stated that Penn State University would take in \$1.2 trillion yearly from student tuition (not including government bailouts or the billions made on football weekends). The correct calculation

After fueling the tradition of yearly fires from small blazes to steadfast infernos, the fire grew in both rank and prestige within the largest union in the fire industry, The American Federation of Fires and Congress of Inferno-based Organizations (AFF-CIO), eventually serving as the Director of Immolations.

In 2006, the fire was given the title of "Distinguished Trustee" by the AFF-CIO, which we indirectly referenced in the Dobbins issue.

We sincerely regret the error.

given the numbers he cited would be closer to \$1.3 billion.

The Behrend Beacon apologizes for making the assumption that an economics professor can perform basic multiplication tasks.

We sincerely regret the error.

# BEHREND IDOL!

At 7:00pm, come see your fellow students lay it all on the line for the title of Behrend Idol.

17 to support and have your say in who you think is Behrend Idol. All are welcome to participate!

will serve as judges  
awarded to Judges Choice  
People's Choice!!!

Sponsored by the  
**Penn State Behrend Matchbox Players**

Deadline for sign ups are in the Office of Student Activities by Friday, March 19th by 5pm
