

The Moogs Hits Behrend

The Student Union Board will present Chris Swanson and his Moog Synthesizer in Erie Hall May 2, at 8:00 p.m. Prices for tickets are \$1.50 for Behrend students, \$50 for activity card holders and \$2.00 general admission.

Chris Swansen Plays On Moog Synthesizer

The Student Union Board will sponsor a coffee-house Friday, April 28, beginning at 9 p.m. in the RUB cafeteria or the picnic grove, weather permitting. The coffee house will feature local talent. Admission is free with an activity card, 25 cents without.

Chris Swanson and the moog synthesizer will appear in Erie Hall, Tuesday, May 2 at 8 p.m. Swanson will present a full two hour concert-lecture-demonstration of the moog, with a music range from Bach to the Beatles. Swanson is from the RA Moog Company, Trumansburg, New York and has traveled all over the U.S. and in Europe demonstrating the unique instrument. Tickets are on sale at the RUB desk and the door. Admission is 50 cents with activity card, \$1.50 without.

"Brewster McCloud," starring Bud Cort, Sally Kellerman,

Willima Windom and Shelly Duvall is the movie of the week, to be shown in the RUB Lecture Hall. Admission is 35 cents with activity card, \$1. without. Shows are at 7 and 9 p.m.

The movie is a social satire of a man's lost innocence and his futile attempt to "fly" away from a materialistic society. It introduces naive Brewster, who lives in the Houston Astrodome, where under tutelage, he practices building himself up for an actual flight using musclepropelled wings. After numerous setbacks he finally takes off, but cannot fly because he lost his virginity. Director Robert Altman has made this black farce a virtual cartoon-collage of eccentrics and behavior patterns.

Behrend Shorts

Student Affairs

The Office of the Dean of Student Affairs is coordinating plans for a 1972-73 Student Encampment to be held in September. Faculty are urged to note the date of September 9 for a tentative Student Encampment Day. Further information will be announced.

Holiday

The University will observe the Memorial Day holiday on Monday, May 29 and July 4 on Tuesday, July 4.

Five Penn State Students Chosen for NSF Allocation

Nit-picking is usually a derogatory term, but it won't be for five Penn State students this summer.

They've just won a National Science Foundation grant to conduct highly intensive, scientific "Nit-picking" on a supposedly clean stream that flows into Lake Erie - Walnut Creek.

"The creek looks clean," says William O'Kelly of Erie, student director of the project, "but could be deceptively so. We want to find out what its permanent residents have to say about the way the water is affecting them. I mean the microscopic and other life-forms that live in it."

Walnut Creek has the potential of helping to recharge the dying water of Lake Erie.

"But if the stream isn't really clean, it isn't doing the lake any good. We want to find out so we can recommend appropriate action to water quality officials," O'Kelly said.

The students won't collect any live nits but they will be sampling water for bacteria, insects, fish and microscopic plants, called diatoms.

Basing themselves at the Behrend Campus of the University which all attended, the students will use laboratories there to make chemical analyses. They'll also use the computer terminal which will enable them to process data on the Penn State computer, some two hundred miles away at University Park.

Faculty advisor for the project is Dr. E.C. Masteller, assistant professor of biology at the Behrend Campus.

O'Kelly hopes the data will constitute a biological chemical profile of Walnut Creek.

"It should be of use as an informational resource for future investigators," he says.

This is the second consecutive year the National Science Foundation has sponsored student projects in ecology. A total of \$1.9

million has been awarded this year in support of 134 projects, two at Penn State. O'Kelly's group will receive \$10,630.

Students working on the project at the Behrend Campus are:

Kathleen A. Powierza of Erie; John F. Keegan, Sutersville; Herman D. Liebau, Erie; Robert C. Schoenfeldt, North East; and O'Kelly all former Behrend students now at University Park.

Research Grant Given

A group of Behrend and former Behrend students have received a grant to do a biological study of Walnut Creek, using Behrend Campus as a base site. Pictures are Bill O'Kelly, Project Director, Peter Grant, Pathy Powierza, and Dr. Ed Masteller.

Keystone Application, Veterans Hold Meeting

Veterans

The Keystone Honor Society is now accepting applications for the Spring pledge class for induction into the Honor Society this term. Applications can be picked up at the RUB desk or the library until May 3. Applicants must have at least a 2.5 grade point average.

There will be a meeting of the Veterans club next Thursday, May 4, in the Behrend Building 123. It will be held during Common Hour, from 10:50 to 12:00 noon. Information about upcoming bills, both state and federal, will be discussed at this meeting. All those interested are invited to attend.
