ROTC Col. Claims Success

"Back in 1970 we had 360 students in our unit and with all the unrest on campus we felt lucky to have that many," Col. Robert Rose, Professor of Military Science for the Army ROTC unit at Penn State University recalled. "Today we have 843 students. Things are different. We have a very successful program."

Part of that success, according to Col. Rose, is due to changes in ROTC itself. In order to meet the needs of today's total Army which includes Active and Reserve Components, ROTC changed to meet the needs of today's students. As a result, some Military Science courses are so popular that many students who are not enrolled in Army ROTC still elect to take the Military Science classes.

"The old image of ROTC as a bunch of guys in uniform marching across campus is gone. Which points out another difference. Today, Army ROTC is open to women. We have 11 female students in our classes here at Behrend College and they are all great," Cpt. Schneider Asst. PMS at Behrend College added.

While there is still a certain amount of drill, marksmanship and military exercise required

for officer training. The program is augmented with special adventure training programs such as Cross county skiing, orienteering, rappelling, winter survival training and canoeing.

The four year program is divided into two parts: The Basic Course and the Advanced Course.

The Basic Course is normally taken by students during their freshman and sophomore years, according to Cpt. Witherel, Asst. PMS at Behrend College. "It's sort of a testing period for the students and for Army ROTC. The student gets a taste of Army Life; a way of finding out beforehand if he or she really feels that ROTC is the place to be. It gives us a chance to evaluate the interest and ability of the student to find out if he or she has what it takes to make it in Army ROTC and continue on in the Advanced Course."

There is no military obligation during the Basic Course and a student may withdraw at anytime up to the end of the second year.

In order to enroll in the Advanced Course, a student must successfully complete the Basic Course, have demonstrated officer potential, and be able to meet the Army's physical requirements. Each student in

the Advanced Course receives up to a \$1,000 per year in living allowance.

"It is at this level that a student incurs a military obligation," Cpt. Schneider explained. "However, this can be fulfilled in several different ways. Depending on the needs of the Army at the time, the student, upon graduation and commissioning, may compete for Active Duty or elect to serve in either the Army Reserve or National Guard."

Another reason for the growth of Army ROTC at Penn State is the excellent leadership and management training available, according to Col. Rose. "This kind of training is invaluable when the students are looking for jobs. Many employers recognize Army ROTC as a sound background for potential executives."

The Phantom Philosopher

It forces one to examine their moral structure in an effort to resolve the situation while keeping one's value systems in harmony with their being, we must admit the existence of an inner being, otherwise it's useless.

THE PROSPECTS OF SURVIVAL AFTER DEATH.
I don't know how to do anything

without existing, and since I can't do anything I don't know how to do, I must still exist after being evicted from this organism I now inhabit. (Provided we admit to a difference between biological activity and consciousness). THE MEANING OF LIFE.

Whatever you take it to mean (Or, fill in the blank).

ON FINDING THE PERFECT RELATIONSHIP.

There is no perfect relationship. There are pleasant relationships, and unpleasant relationships. You decide which kind you want and try to find it. (The pleasant one's are the hardest to find, but the unpleasant one's are the easiest to live with.)

Cub Clippings

Remember all those zany, neat stunts college students used to do? If they weren't all piling into Volkswagens, or telephone booths, they were eating disgusting amounts of goldfish, making the non-college goers rather doubtful of Americas youth.

Well, some good old boys from Behrend have, in their own gluttonous way, revived a little weirdness in college life. Mr. Charles Hobbs, Mr. Gregory Cannon, Mr. Lee Campbell, Mr. David Costozo and Mr. Dan Sochs slurped their way into South American coffee growers' hearts by downing over 80 cups of Dobbins delicious blend coffee. I didn't know whether to shake all their hands or shake my own head in disgust. All 5 live in the luxurious Larry highrise.

It would be nice to see a larger attendance at Behrend basketball games, especially the women's contests. The Lady Cubs play a determined game and are exciting as well as en-

tertaining.

A special thanks to all the folks who contributed to the mess and slime that accumulated on the hill outside Lawrence Hall and Dobbins. I haven't seen a slum in a while and it made me yearn to see West Side Story again. Well, there goes the neighborhood.

As Mr. Carter, the Congress and many war mongering individuals lick their chops over the Afghanistan conflict, I ask, "Which way to the nearest conscientious objector form..."

It doesn't seem like too many students know what their doing when it comes to making out schedules and what a course involves. On the days of February 4 and 5 an estimated 200 students dropped a course. I heard one student say after dropping a class, "I had a 95 per cent in it and I was just getting too bored. Excuse me."

Happy Valentines Day.
