

# Behrend Collegian

VOL. XLII

STATION ROAD, ERIE, PA. 16563

THURSDAY, MARCH 24, 1982

The Student Union Board has announced that Livingston Taylor will appear at Behrend on Monday, May 3. The Student Union Board also has set prices for the concert: \$4.00 for students without activities card, \$3.00 for students with activities card. Tickets will go on sale soon.

## NASA Chief To Visit

Science majors, particularly Computer Science majors, will have their days April 5th through the 7th, when NASA chief Dr. Robert Chapman comes back to Behrend College.

Dr. Chapman went to Behrend for two years before completing his Physics degree at University Park. Dr. Chapman went to the University of Michigan and then Harvard for his graduate work, receiving his PhD from Harvard in 1964.

Currently, Associate Chief of NASA's Laboratory for Astronomy and Solar Physics, Dr. Chapman has been active in the recent Space Shuttle program. Dr. Chapman is responsi-

ble for the on-board operations software and data handling systems for the shuttle.

Dr. Chapman has written extensively on the subject of solar physics and astronomy. He is the author of two books and over thirty articles on these subjects.

During his three-day visit, Dr. Chapman will visit a Humanities class, and classes in the Natural Sciences and Engineering Division.

On Tuesday, April 6, Dean Lilley will present Dr. Chapman with a Medallion Award, the most prestigious award given by the Pennsylvania State University.

Of particular interest to all students will be Dr. Chapman's

lecture on the recent Skylab and Space Shuttle missions. The talk will be accompanied with slide photos of these recent missions. The lecture is tentatively scheduled for Tuesday, April 6, in the Reed Lecture Hall.

Dr. Chapman will be in residence for three days, April 5th through the 7th. Additional opportunities are being planned for students to meet with Dr. Chapman.

The Division of Natural Sciences and Engineering hopes that both science and non-science oriented students take advantage of Dr. Chapman's forthcoming visit.

## Congressman Speaks

Congressman John LeBoutillier, a Republican from New York's 6th District, said Monday night that he supports federal loans for students, but thinks the loans should be "tied to performance and attendance."

LeBoutillier, invited to Behrend as part of this year's culture series, commented on the student loan issue in a speech in Reed Lecture Hall.

"If students demonstrate a need (for student loans)," he said, "I want to see them get it."

The Reagan Administration proposes to cut student loans to graduate students. The proposal will make students pay back any loans while they are still in school, rather than repay them after graduation. LeBoutillier described the new system as "physically impossible" for graduate students.

Regarding the draft he said, "I'm not personally opposed to the concept of drafting if there is a need ... We don't need a draft in America, at least not in the foreseeable future."

LeBoutillier calls for escalating the earnings of present military servicemen and women. "The key problem is keeping them in ... Once we train sophisticated technicians, we lose them for economic reasons. They have to make a living."

He feels that the only viable solution is to pay military personnel on a comparable basis to what they would earn in industry.

He stated that, "The only other alternative that I can think of would be to draft men and women for 6 to 8 years at a time, but that would be ridiculous."

As for the ERA Amendment, LeBoutillier said, "I would have voted against it. For me to have supported the ERA would have been politically dangerous." He described the movement as "too radical."

He attributes the failure of the ERA to feminists like Bella Abzug and Gloria Steinem. "The ERA was beaten the day they let the feminists run it." He feels that the ERA would probably have been more successful if

"Betty and Jerry Ford ran it."

However, Mr. LeBoutillier is not completely against the ERA movement. He said that he would support specific laws to ensure equal pay for equal work for women.

Moving to his stance on abortion LeBoutillier had this to say, "I can't relate to the abortion issue ... I'm not a woman." He also stated that he is against "federally-funded abortions."

LeBoutillier, a co-sponsor of the Human Life Amendment, which if adopted would make most abortions unconstitutional, made exceptions in the cases of rape, incest, or in cases where the mother's life is in danger.

Congressman LeBoutillier serves on the House Foreign Affairs Committee. He is "disappointed with Reagan's foreign policy." He described Alexander Haig as a "living disaster, a belligerent general who is out for himself."

LeBoutillier feels that Haig and Weinberger are a hindrance to Reagan and that they consistently give the President bad advice.

On the subject of the Soviet Union, he said, "I believe the biggest battle in our lifetime we will fight is the battle of ideas against the Soviets."

"The best weapon to combat the Soviets is communication," he said. "We must bring communication into the homes of the people in the Soviet Union that they are not presently allowed to get."

LeBoutillier feels that we must unite with the Soviet people "to cause another Poland in the Soviet Union."

Regarding the present situation in El Salvador, the congressman replied, "After Sunday's election, whichever side wins will be the legitimate government of El Salvador."

After the election LeBoutillier feels that the United States should pull out of El Salvador. He stressed that other countries should also stay out of El Salvador, leaving the country to a policy of self-determination.

## Award Forms Available

The Dean's Office announces that forms are now available to nominate faculty members for three individual awards.

The EXCELLENCE IN TEACHING AWARD has been presented yearly since 1970 to recognize "that faculty member who in the opinion of students and colleagues most truly fills the role of an inspired and committed teacher."

Previous recipients of the award include, since 1970: Philip Iobst, Jeffrey Steinbrink, Edwin Masteller, A. Daniel Frankforter, Mary Chisholm, Charles Kolb, Donald Leavers, Michel Small, Barry Weller, Robert Hostetler,

David Roth and Steven Ward.

The Guy W. Wilson EXCELLENCE IN ADVISING AWARD was established this year, recognizing an outstanding faculty advisor. As with the Excellence in Teaching award, consideration is given to all tenured and tenure-track faculty at Behrend.

Also, new this year is the Behrend College Council of Fellows' FACULTY RESEARCH AWARD. This award recognizes a tenured or tenure-track faculty member who "fills the role of an inspired, dedicated researcher at
