

**Student Voice:**

*"How effective has your advisor been in giving you guidance toward class choices and other important decisions?"*

On Monday, April 7, students at Behrend can begin registering for the Fall of 1986. When registering and organizing a working schedule of classes students often need to consult their advisors for assistance. This week's Student Voice column asks: "How affective has your advisor been in giving you guidance towards class choices and other important decisions?"

**Patricia Moore--Second Semester, Psychology--**"No Help. I went to my advisor. I put down

what classes I had already taken and didn't know that I didn't have to take them again until I was in line, so he didn't help."

Patricia Moore

Darryl Hill

**Darryl Hill--Second Semester, International Business and Marketing--**"I've been to three advisors, and I picked my own courses and he didn't give me any type of guidance or anything. They don't tell you how easy it is to pick up a minor or about prerequisite courses that you should have."

**Sue Rattenbury--Second Semester, Art--**"I made up my schedule, and I had a lot of questions that he couldn't answer. But at least he called the people to see what the answers were. I think there's a lot of little things that I

Sue Rattenbury

need to know that he should be telling me."

Kevin Goliwas

**Kevin Goliwas--Sixth Semester Business--**"My advisor this year is new, and I taught him how to advise me."

**Sharon Burns--Second Semester, Higher Education--**"She knew what she was talking about. I heard from a lot of other people that their advisor didn't give them much help, but my advisor helped me a lot."

Sharon Burns

**Safety suggestions offered**

by Todd Allen  
Division of Police & Safety

The following is a general emergency response guide for students, faculty and staff. This guide covers three general categories of emergencies:

- (A) Fire: 1. Ring fire alarm; 2. Call Police and Safety and stay calm, they will call Fire Department; 3. Leave the building when the alarm is activated--use the most accessible and closest exit--do not run!; 4. Fire extinguishers are available for small fires. Activate the alarm and call Police and Safety prior to trying to extinguish a small fire; 5. If smoke is present, drop to the floor and crawl outside.
- (B) Injury: 1. Contact Police and Safety--they will call the ambulance if needed; 2. Be calm and

explain the who, what, where, how and why of the injury. Do not hang up until the dispatcher says to do so; 3. The Officer on duty will make the decision whether or not to call an ambulance.

any injury, if applicable; 3. Do not touch, or move anything, until the Police arrive and say it is O.K. to do so.

If confronted with an emergency, remember to keep calm and contact Police and Safety at 898-6101 (South Cottage). They will know how to assist you.

(C) Crime: 1. Contact Police and Safety; 2. Stay calm and explain the facts. Make sure you advise of

**Donkey basketball returns**

Plenty of hilarious action and a good crowd are expected to keep Erie Hall buzzing on April 28.

Donkey Basketball is back. Played with four donkeys and

four riders on each team, it is sure to be an evening of unusual sports entertainment.

The game begins at 7:30 p.m.

**Health tips for YOU**

From the Health Center

**CONJUNCTIVITIS "PINK EYE"**

This is an inflammation of the eye with tearing, discharge, burning, itching, and smarting. It may be caused by various organisms or irritation from wind, smoke, dust, light, contact lenses, eye make-up, etc. One or both eyes may be involved.

Treatment: Keep your hands away from your eyes. Use only your own towel. Seek medical attention.

Eye rinse and anti-biotic eye ointment usually clears the irritation in two to three days.

**FLOATERS**

Do you see spots in front of your eyes? These are called floaters. 80 percent of the population are affected by these spots which look like tadpoles or dust spots. They are probably due to tiny specks of dead tissue which come away from the lining of the

eyeball and bob about in the eye fluid. They are generally of no significance, but if they increase greatly over a short period of time seek medical attention.
