

SPORTS REPORTS:

Cross-Country and Bowling

by Tony McGovern

The Capitol Campus recreation/athletic department under the competent direction of Mr. Robert Stanley has and is undergoing rapid progress since the beginning of the term. The cross-country schedule has already been established. (Games and players listed below). The bowling team has already one team and openings for others. (Available times, sex requirements and lessons listed below.) Bob held an officials clinic in the student center on September 30th, in order to instruct students interested in officiating at the intramural football games.

Plans are being made for other activities this term. Around November 2, horseshoe contests for men, women and co-eds will be formed, and around November 4th, a bicycle derby for men, women, or co-eds. Walk-a-mile, cross country, and volleyball are included in these plans. All of these and any other activities will be announced.

Bob told me of his intense interest in forming a student recreation/athletic council. The council would represent the student body and assist in the present and future direction of the Capitol Campus athletic, recreation and intramural programs. Students interested in the program and its present design can contact Bob Stanley (Recreation/Athletics Coordinator), Ron Johnson (Dorm representation), or Bruce Finster (the

Meade Heights representative.)

 1 to 3 p.m. Tuesday and Friday
 10 a.m. to 12 noon Monday, Tuesday, and Friday.
 N. B. The mixed league on Wednesday is closed.

"Forbidden Games" In Auditorium

The Cultural Film Series announces the presentation of **Forbidden Games**. This is perhaps the greatest antiwar film since *La Grande Illusion*. It is the poignant story of two young French children who become playmates during the German occupation during 1940. The game of burying dead field animals becomes the children's secret, as they imitate the cruel adult life that surrounds them. Winner of the Venice Grande Prize. The sensitive portrayal of the horrors of war will be shown in the auditorium at 7:30 p.m., on October 26, 1970.

fight has generally been accepted. This is far from the truth. Our fight is a truly revolutionary one. The Committee on Environmental Pollution at Capitol Campus will work in coordination with Scope, Student Committee on Pollution of the Environment which has its office in Washington.

Meeting announcements will be printed in the *Capitolist* and posted on bulletin boards around the ad building. If anyone would like to contact me concerning the committee, my house number is 824B Nelson Drive, and my phone number is 944-7785. The first meeting will be held on Tuesday, October 13th at 7 p.m. in W245.

Football Schedule

Faculty Team vs Junk — Oct. 8 at 4:00 p.m.
 YJC'ers vs Gino's Giant's — Oct. 8 at 4:00 p.m.

 Faculty Team vs Hell, Death & Destruction 'B' — Oct. 22 at 5 p.m.

GRASS?

(continued from page 8)

circulation. The people who are reading these articles want to know the truth and deserve to know it.

And, finally, students. If the article "Alcohol and Tobacco vs. Marijuana" stays on the bulletin board, hear a few suggestions for its use. Write "Punch Line" next to the last sentence (complete with circles and arrows) and send it to a friend who is a head. Get some pencil shavings and roll a giant joint for a friend who is not a head. Tear it up and use it to roll a real joint—yeah. Those of you with masochistic tendencies can use it for bathroom tissue. Best of all send it home to mother and tell her what good care you are getting here. But please, please don't read it if you are high. It would probably be very funny. And it's not.

ENVIRONMENT

(continued from page 7)

mental rights of people, environmental rights. These social costs must be cycled back to the polluter, so that they are prevented at the earliest stage of production. We then must communicate to the public and pertinent authorities the known or knowable technological remedies. This technology can be employed with relative ease, but the structure of our corporations prevent them from seeing this. We often get the impression that industries are working at the limit of technology in controlling pollution, this is nonsense and ego-pornography. To get back to some of our objectives; we must undertake campaigns to halt the excessive growth of population, the depletion of our natural resources, and the pollution of our water, earth and air.

Our purpose should not be so much with the control of the air, water, and land, but the control of man. We must all become aware that our attack on the environment is an attack on ourselves. As Pogo stated, "We have met the enemy and he is us." In this new enthusiasm with the fight to save our environment, there is much rhetoric, and too little understanding of ecological problems. Everyone does the new movement by service, it is very popular, and everyone seems to know about it. This has its advantages and disadvantages. It can mislead the concerned person to believe that our
