

Capitol Campus: Seed-Bed For Neo-Nazi Elitism?

by Roger Nielsen

There is a very dangerous current of Elitism circulating at Capitol Campus. It is widespread. Many students here are going to college to use their degrees as barriers between themselves and those who are less fortunate, those who couldn't come.

Why is this happening? Perhaps it is because many of those who are here are from lower-middle class homes, or middle-middle class homes. They want a piece of the action, and education has flamed the fires of ambition.

Many of these college Elitists learned these things from professors here. The majority of the faculty are ostentatious status-seekers. They are not above the rat-race; they have created their own little rat-race right here. If we want to talk about the failures of our educational system, here is one example.

At any rate, the majority of students here do not see themselves as one of the "people", of the "public", of the "masses".

Is this feeling natural? Baseball players, actors, teachers, politicians, servicemen, all see themselves as separate and apart from the public. They fail to realize that they are the "people". To inflict injury upon the "people", is to inflict injury upon yourself.

Another reason that many students see themselves as elite is because they possess the ability to think, to analyze, to revolt against, to question. True, the greatest majority of the human race does not question. They have their habits, customs, traditions governments, religions, and they don't question them. They simply

obey.

It is the duty of these academic Elitists to encourage revolt among the people. These Elitists may feel an obligation to "take care" of the people, only in a moral manner. This idea, is of course what has screwed up the human race. Instead of encouraging people to think independently, to neutralize social pressures, our group of Elitists would prefer to control the people, they still want to separate themselves, and power and control is a good way to accomplish this. So our group of Elitists will become lawyers, professors, politicians, businessmen and social workers. They will do their best to keep the people in darkness; they will not attempt to encourage revolt, the questioning process. The Elitists had better take a look at themselves; they are leading us to another Neo-Nazi regime.

Spiro Agnew recently called for a new wave of intellectual Elitism. He decries students who attempt to solve social problems. He refers to see a great return to the ivory tower; he seeks an end to the "relevant education", in his own words. He does not have to worry. Our students are doing this of their own free will.

If they chose to reverse this trend, they could show the "people" how to think for themselves. We would then have no need for churches, armies, rigidly-run schools, contemptuous social workers, caste systems, master-slave relationships, racism, and imperialism. Freedom and unity is the ultimate destiny of the human race. But our Elitists are holding us back.

Thou Shalt Not Steal!

by Ann Ostroski

It's been approximately only four weeks that Capitol Campus has been in session and regrettably it's been reported there have been 14 attempted larcenies on campus.

Mr. James Paul, director of security, is presently investigating all possible clues which lead to the person (s) involved. He can only do so much — it's up to us students to

control this situation.

The thief trend is slowing down, due to the alert bulletin, but carelessness on our part may cause reoccurrences of the robberies. We can't distrust our friends and neighbors due to one or two persons, but don't be an accomplice to these crimes by allowing temptation to prevail. LET'S NOT HELP OUR VILLAIN — LOCK YOUR DOOR.
