

# Computer Employment Service

## An Open Letter to the Student Body,

Recently, computer experts have devised a system that will expose student applications for employment to over twenty thousand employers from coast to coast and twenty foreign countries.

The concept is very simple. A large number of companies find it convenient to lease computer time for their own use (called time sharing or remote batch usage) from computer service companies set up for just this purpose. Through computer terminals in their offices, they have access to a fantastic amount of knowledge and service at very inexpensive rates. As a matter of fact, virtually all of the Fortune Top 1300 companies are either vendors or user.

Through the use of extremely thorough and complete resumes, American Personnel System Corporation is forming the most complete and extensive personnel bank in history. This data bank is being made available to every corporation with a terminal facility. All major vendors of computer time, including General Electric, University Computing, Control Data Corporation, United Computing, Service Bureau Corporation, McDonnell Douglas, and others, have

contracted with American Personnel and are currently working to make this service available to all of their client/users, over twenty thousand strong, employers of almost all types of positions known.

As an example, the personnel officer of a large corporation (say U.S. Steel) receives instructions to hire a graduate in chemical engineering for their facility in Dallas, Texas. The officer then feeds the computer the appropriate job requirements. At this point the officer is unaware of the sex, age, creed, color, religion, name or address of the applicants. His choice is made only on background and skills. The selected applicants are then sent an invitation via the computer to call the officer for an interview. Since the applicant has detailed in the resume the job characteristics he or she demands, they know that the position offered meets or exceeds those demands.

The one time total charge to the applicant for twelve full months of exposure is only \$25.00. This is the only fee the student pays and the employer will pay no fee; the only expense to the employer will be computer time to look at resumes. The charge for this should average less than a small want ad in the local newspaper.

Posters have been furnished to the President of the Student Council, with take-ones attached. These informational posters are placed in traffic areas of the campus.

With the end of the school year fast approaching, the need has never been more acute for students to consider their professional futures.

Dear Representative \_\_\_\_\_,

As a student at Penn State University, I am concerned about the proposed rise in tuition for next year, an expected \$150. Increase in total college expenses for 75-76 academic year is predicted. This increase will present an extreme financial burden on myself and my family. Last year there was a \$90. tuition increase, and if tuition goes up again, this year, especially with the present economic crisis, it may be difficult for me to complete my education.

Governor Shapp's budget proposal for Penn State is far below the amount requested by my university. If the university doesn't get the money it needs, the students will have to pay the difference, a difference that many of us cannot afford. It would be tragic if even one student is forced to drop out of school because of tuition that is too high in a state-related university. Students' futures are at stake, so I urge you to please vote the necessary funds for Penn State in order to prevent a tuition increase.

Sincerely yours,  
Joe Student
