**Kiss the big burger good-bye.**

According to economists, hamburger's going to hit \$25 a pound in 20 years. So start stashing your money away each and every month or you'll never be able to afford it.

Life insurance is a good way to help you save regularly for the future, while giving you needed protection.

Stop by our campus office and let's talk over our life policy. You won't have to kiss anything good-bye.

**WZAP Plans To Have FM Operation**

Drawing and Story by John Lelerzapf  
Staff Writer

Did you know that WZAP is seriously planning to become an educational FM radio station? The drawing (LOCATION) is the way the new station could look in the near future if plans, being worked on now, are adopted.

The facility is expected to be located on the third floor of the main building and will consist of four studios. Studio A will be the master control studio and house the FM transmitter. Studio B will handle production and have control of Studio C. Studio C will be used for the recording of or live presentation of group discussions or small musical groups. Studio D will be the news delivery booth. Extensive patching networks will enable the studios to be interconnected singly or in combination with each other. This will allow three separate activities to take place within the facility without disturbing the FM operation going on in Studio A.

The new station will function as a training ground for students planning to seek employment in the broadcast industry and provide music and programs of public interest to the local communities.

The proposed radio station facility should prove to be a vast improvement over the existing one. At present, WZAP has only one studio which is used for all operations and is not adequately soundproof. This complicates operation and limits the amount and kinds of usage that should

normally take place.

At the present, time is of major importance because there are only a few remaining frequencies available for use in the Harrisburg area. If everything goes as planned, WZAP will have one of them and begin operation as an Educational FM radio station.

**New Forms To Be Used**

The Records Office at Capitol collects and retains data and information about students' academic records.

Recognizing the student's right to privacy in exercising control over the disclosure

of those records, the office has designed a new form for use during the Winter Term which will govern local action in releasing information.

The following information is considered public information which may be made available without prior consent of the student: name, address (local and permanent), telephone number, date and place of birth, major, student activities including sports, weight/height, dates of attendance, date of graduation, degrees and awards received and most recent educational institution attended.

The student may use the new confidentiality form to request that any or all of this information not be made publicly available.

The form may also be used to indicate which inquirers may or may not receive copies of or information from a student's academic record.

All students should have a confidentiality form on file with the Records Office.

If a student did not complete a form during registration, he/she should report to the Records Office.

Delay in filing a form may cause unnecessary delay in releasing information to legitimate inquirers for purpose of credit or employment.

**Art Exhibit In Gallery Lounge**

An art exhibit of Medical and Surgical drawings and watercolors by Steven Gigliotti is on display in the Gallery Lounge until Dec. 5, according to Roberta McLeod coordinator of student activities.

Gigliotti, a native of Utica, New York, attended Rochester Institute of Technology where he received an associate degree in Applied Science and also was awarded a certificate in Art as Applied to Medicine from the University of Rochester School of Medicine.

In addition, he has an Associate in Medical Art from the University Of Pennsylvania School of Medicine.

Gigliotti has done many illustrations for many medical journals and various publications. He was the illustrator for the Philadelphia Inquirer Art Dept. and the editor of "Medical Art".
