## Former Chile Ambassador Speaks on Campus

By Robin Platts

"We are the only country in the world that has the resilience to consider its history and benefit from it. We are a society that consumes information at a furious pace," said former Ambassador and Journalist Edward M. Korry, at a Press Conference Thurs., April 28, held here.

Edward Korry, former ambassador to Chile and Ethiopia, came to the Capitol Campus at the request of Dr. Richard H. Heindel, Professor of International Affairs, to be a part of the first Capitol Campus Press Conference. The format of the conference was to simulate a White House Press Conference and U.S. Senate Committee Hearing. There were 10 representatives from the local press corps. Mr. Korry discussed and then answered questions concerning "The I.T.T. and Lockheed Scandals--Their Origins."

Korry began the Press Conference by giving his view of how and when the I.T.T. and Lockheed scandals began to interfere with International Politics. Korry claimed that although President

John Kennedy distrusted multi-national corporations, he asked David Rockefeller in the spring of 63, "to organize a group of multi-nationals to support American policies in all of Latin America. Attorney General Robert Kennedy legitimized the multi-nationals passing money to foreign politicians by integrating members of these business groups into covert actions of the U.S. throughout Latin America.

Korry explained that he was unaware of the United States government and CIA involvement attempting to overthrow President Salvador Allende, through the Chilean military in 1970. He remained unaware until 1975 when a Senate Committee swore him to secrecy and informed him about what had taken place while he was ambassador.

This is when Korry decided to "Blow the whistle." Since this time Korry has been unable to procure full time employment in the public service or journalism fields. He has sold his home and property and is going abroad in September. But he adds, "This has been

a fight of my own making."

After the discussion of multinational interference in U.S. foreign affairs, Korry stated, "As we threw out the garbage of Watergate we also threw into

the ashcan all the other unpleasant things that were like it." Korry then went on to field questions concerning Ethiopia, and other countries and the future of U.S. Foreign Policy.

## A Note Directed To Motorcyclists On Grass

During the last several weeks there has been a significant increase in the number of motorcycles on campus. As a result of this increase several questions have been raised. Like any other motor vehicle, motorcycles of any type must meet the requirements for registration on campus and must be registered. To be registered a motorcycle must have a current inspection sticker, current license plate, and the operator must have a valid owner's card. In addition, the bike must be covered by a minimum of \$10,000 liability insurance.

Some of the questions about motorcycles have concerned the use of

them on campus. As with any motor vehicle the operation of motorcycles is confined to roadways. They may not be driven across the grass or sidewalks. In essence, their use is confined only to the streets on campus. In Meade Heights there have been several complaints about misuse of motorcycles. Quite a few of these complaints have indicated that they are being driven too fast and that they are being driven across lawns, etc. Because these uses endanger not only the operators but other persons on campus, they are not permitted.

Likewise, major hazards are created by those who perform repairs on their motorcycles near the residences. This practice is not permitted because of the danger of fire, etc. For the same reasons motorcycles may not be stored in houses and/or storage sheds.

Specific questions have been raised about "off road" or "dirt bike" types of motorcycles. Normally these bikes are not licensed or inspected. Consequently, they are not eligible for registration on campus. Their use is not permitted any place on campus unless they meet the requirements for registration and are registered. Vehicles of this type may only be on campus if they are stored on a registered trailer or in a registered van or arrangements are made with the Office of Safety and Security for special listing. All other aspects of the regulations governing vehicles pertain to all types of motorcycles.

Any vehicle, including motorcycles, which is operated on campus in an unsafe fashion or a manner which is in violation of the vehicle code and/or the campus regulations or which is not registered subject the operator or owner to state and/or campus citations or campus discipline action.
