

# Professor Recieves Award

Middletown--Dr. Charles Cole, Professor of Engineering at Capitol Campus, and Project Director of Water Quality Management Curriculum Development, has recently been awarded a one-year continuation award in support of his project, Curriculum Development of a Bachelor of Engineering Technology in Water Quality Management.

This Federally-funded Environmental Protection Agency grant was initially awarded to Dr. Cole in September 1977, and again in September 1978, for the development and support of a Water Quality Management Option at Capitol Campus. The program is on a

two-course track--one oriented toward design and operation of water and water waste plants, and the other emphasizing the monitoring, surveillance and planning, and implementation of water quality.

Dr. Cole related that there are, at present, 36 students in the two-track program, with enrollment about equally divided. "We at Capitol Campus provide professional objective training in engineering technology, and are impressed with the quality of students in both programs," he said.

According to Dr. Cole, "our graduates skilled in the design and operation of water and waste water plants are very

much in demand today. And those persons knowledgeable in areas of monitoring and implementing water quality also are needed now, with the need for them continuing to grow in the future, as we attempt to enforce water quality standards being imposed by the Pennsylvania Department of Environmental Resources and the U.S. Environmental Protection Agency," Dr. Cole added.

"Any agencies, consulting firms, or other organizations requiring skilled water quality management graduates are encouraged to contact the Placement Office here at Capitol Campus," he continued.

Interested students desir-

ing information regarding the Water Quality Management program at Capitol Campus are invited to contact the Admissions Office. Some Grants-in-Aid for the 1979-80 academic year are available to qualified applicants.

Course work includes the traditional basic engineering sciences, plus specific studies in water treatment, water pollution control, statistics, economics, water quality management

and planning. Students also will have an internship at an organization specifically involved in water quality management planning or implementation.

Assisting Dr. Cole in this program are Capitol Campus faculty members Dr. William Welsh, Civil Engineering Technology Program Chairman; Professor Lorna Stoltzfus, Assistant Professor of Chemistry; and Dr. G.N. Rao, assistant professor of engineering.

## Programs Designed For Security On Campus

Recent events on campus make it necessary for the Department of Safety and Police Services to call attention to the fact that the national trend of an increase in crime on campus has caught up with Capitol Campus. We believe that a combined effort on the part of each and every one of you, as concerned members of the Pennsylvania State University, Capitol Campus community and your Campus Police Department, is the only way we can be successful in launching a counterattack on this trend.

Your Campus Police are committed to making our campus as free of crime as is possible. To accomplish this objective and to reduce your chances of becoming a victim of an on-campus crime, the Campus Police have initiated several programs designed to reduce the possibility. We urge you to take advantage of these programs and to play an active part in the overall effort to reduce the opportunity for crime on our campus.

**STUDENT PATROL** - The Student Patrol is an organization providing a support service to the Campus Police through interaction and direct liaison with the student body, faculty, staff, and visitors, to our campus. Although not sworn police officers, through their roving patrols and constant radio contact with the Campus Police, the Student Patrol does provide additional "eyes and ears" to enhance the coverage of the campus.

**HOME SECURITY SURVEY** - At your request, a member of the Department of Safety and Police Services will make an appointment with you to survey your residence and suggest to you methods that you might use to increase basic security and protection of your personal property while here on campus.

**HOUSE CHECKS** - A minute

of your time to request a house check while you are away from campus for a prolonged period of time will result in a Campus Police officer responding to your residence (Meade Heights and University Apts.) and performing a perimeter check of that residence on each patrol during your absence.

**OPERATION IDENTIFICATION** - This is a program wherein your Campus Police Department in conjunction with the Governor's Justice Commission and the Federal L.E.A.A. program have combined efforts and facilities to provide you with a means of identifying your readily transportable valuables. You may borrow from your resident assistant or from the Campus Police Department, an electric scribe or engraver and engrave your state driver's license number on each and every item of value in your possession. The fact that you have done this, and that you make that fact known by displaying a window sticker we will provide, reduces the value of those items in the market for stolen goods. It further makes possible your ability to positively identify these items and to reclaim them if they are recovered by a police department or anyone else. You should mark each item in a conspicuous spot, and then also mark it again in a hidden or concealed spot if at all possible. Remember, these scribes or engravers are made available to you through your resident assistant both in Meade Heights and the dorms, plus at the Campus Police Headquarters.

The above described programs have been developed as parts of our ongoing program to assist you in making your campus a safer place for you to reside and pursue your education. We strongly encourage

each and every one of you to participate in the aforementioned services and programs.

If you have any questions or are in need of any information in an area in which we may be of assistance, please do not hesitate to call us at 787-7936.

Terrance P. Leahy  
Crimes Prevention Officer

James H. Paul  
Coordinator Safety  
and Police Services

## Name Change

During the past several years a number of improvements have been made in our Department of Safety and Security Services. The most significant among these occurred about three years ago when we discontinued the use of contract security guards and hired officers directly as members of the staff of the campus. These officers all had the training required to be sworn police officers in the Commonwealth of Pennsylvania.

As we have reviewed the

operation of this department and compared it with other departments, it is apparent the name of the department should be revised to reflect more accurately the responsibilities assigned to the Department and the status of the officers in the Department. Thus, the Department of Safety and Police Services now has been renamed as the Department of Safety and Police Services. This action does not change the responsibilities of the Department, rather it more accurately identifies the Department.
