

Name John Brown
Term Grad. Student
Major Admin.

Response - All elements considered (including radioactive iodine), I feel that the University interest in this matter is to protect the student population. To accomplish this, Capitol Campus should shut down in the event of a radioactive release.

Name Ted Michaliga
Term 12
Major Bus. Admin.

Response - TMI has been an injustice to all of us. I feel the steam should be bottled up and taken to Wash. D.C. and released during the next congressional session to give everyone an even chance.

Name Mary Murphy
Term Grad. Student
Major El. Ed.

Response - Since this campus is made up of an adult population each must weigh the evidence presented and make their own choice. Hopefully the decontamination procedures which have been discussed, will precede the emission.

Name Jean Heromin
Term Grad. Student
Major Education

Response - I feel that if there is even a slight chance that the steam release would be dangerous to us, that we would not and should not be expected to attend classes. I definitely will not be here, I value my health and welfare too much.

Name Michael Koshishvan
Term 7
Major Finance

Response - No, because this could be harmful to us. They still don't know the effects of this radiation being released. They're not exactly sure if radiation will harm us and we shouldn't be around to risk our lives being hurt.

Opinions

a

Do you think the campus community should be required to remain on campus during the next TMI Radioactive steam release (sometime during Oct.)

Name Jill Gottlieb
Term Grad. Student
Major Education

Response - I feel that Penn State Students should not be required to remain in the Middletown area during the release of radioactive steam. Personal feelings, on this topic, need to be considered!

Name Karen Cornell
Term 11
Major Account. and Finance

Response - NO. I am definitely pro-nuclear power if certain precautions are met, such as not exposing anyone to any unnecessary radiation.

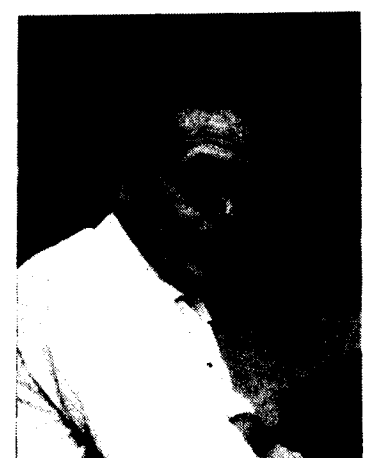

Name George Roberts
Term Grad. Student
Major Regional and Urban Planning

Response - I do not think that the Capitol Campus community should be required to remain on campus during the next TMI steam release.

Name Bill Cologie
Term 9
Major M-M, Hum.

Response - Absolutely not. In fact I don't believe Met. Ed. should be allowed to vent any more radiation into the environment.

Name Curt Miller
Term 8
Major Bus. Admin.

Response - NO. No human should be exposed to radiation.
