Clubbin' around

Darkroom Technician

Hi! My name is Mark Clauser, Darkroom Technician for Capitol Campus' newspaper, the C.C.Reader.

As a junior at the campus, I was interested in the paper and had the opportunity to talk with Harry Moyer, Editor-in-Chief, about taking pictures and maintaining the darkroom facilities.

He was interested in my inquiry and later experienced my photographic abilities in the darkroom. He was amazed at the second-hand nature attitude and quality of the photos.

Later, Harry asked me if I had any abilities in writing stories. I frowned, knowing that I did not have any experience in writing for print previous to this article.

I learned photography from my father at an early age. He worked for the

Graduate Student

Union

Student Union (GSU) held an organiza-

tional meeting last Tuesday. Jitsuro Yamamoto (American Studies) was elec-

ted president, John Flanagan (Human-

(Psycho-Sociology) secretary, and Roya

treasurer. The possibility of sponsoring

a monthly lecture series was discussed.

Members also expressed interest in or-

ganizing a bus trip, open to all students,

to see a Shakespeare play in Washing-

interest regarding a graduate student

lounge will be announced in the next

issue of the C.C. Reader. The GSU's next

meeting is Monday, Oct. 27, at 7:45 p.m.

in the Gallery Lounge. All graduate

students are invited to attend.

The results of last week's survey of

Morning Call paper in Allentown for 28 years and now supervises photographers

Since then, I have had experience snapping for high school yearbooks and papers. In the past two years I have encapsuled special moments at weddings

Now I'm taking pictures for the C.C.Reader and am enjoying meeting different people on this large campus.

I would like to encourage interested photography or journalism students to help our campus newspaper become a better paper than it already is. If you can take pictures or write stories for the C.C.Reader, we would be happy to hear from you. Come out of your shell and really experience Capitol Campus with

Crime Activity Linked to Coal Industry

by James Seda

The Pennsylvania Crime Commission has released a report linking organized crime to Pennsylvania's coal industry.

The report made allegations involving price fixing, and fraudulent loans and

banking practices, among others.

Testifying at a Washington subcommittee hearing were representatives of the Department of Energy. Also present was Commissioner Al Lewis of the Pennsylvania Crime Commission. Absent were the state attorney general and federal Justice Department officials.

Pennsylvania Congressman Allan Ertel has charged the state Department of Justice, the attorney general's office, and the federal Justice Department with not taking adequate action to insure prosecutions. Ertel also cited that such inaction has created a deleterious and counterproductive effect -- guilt by association. The innocent are defensively covering themselves, as they feel they are associated with the charges.

Follow-up hearings are planned soon after Congress reconvenes.

ing more courses at one time, but over a longer period of time. How will faculty be affected?

Professor: That's a good question! Faculty will be teaching three courses each semester instead of two each term and the class periods will be 50 or 100 minutes. Many faculty began teaching 50 minute classes for semesters and they will feel comfortable with the new system. However, the term system seems to have been effective at Capitol, and there is concern about how students, both day and evening, will be affected.

(The Faculty Council is anxious to receive comments from students on how a semester system will affect Capitol Campus students, and ideas on how to implement the changes so as to make it work best for students. Please send your concerns, comments, and ideas to Louise Morgan in Room W-161 before October 27. The results will be shared with SGA).

Cigarette machines being removed

Campus Digest News Service

With no cigarette advertising on television or in campus newspapers, college students are subjected to less media influence concerning smoking. The University of Wisconsin at Madison has gone a step further in minimizing the pressure to smoke.

More than half of the cigarette vending machines at the university have been removed from the campus. A university spokesman said that 17 machines have been excluded from a new vending contract because of the hazards of smoking.
