

Question: Did new semester system affect grades?

"I don't think the people in charge took into account the effect it would have on the students. . . though this semester seems better organized. I'm better able to keep up with the course work."

PAMELA SMITH
Marketing

"My grades were slightly higher. I was more relaxed having fifteen weeks to do the course work."

MARY ANN FLEISHER
Elementary Ed.

"I think it's easier this way. You don't have to cram so much into so little time."

RICK BLAUCH
Accounting

"The amount of work put into the class rather than the length of the course should determine the grade."

Mechanical Engineering
TUAN DOAN

"I'm used to it, but I don't think the teachers are. The tests come too quickly. My grades did suffer, my 'cume' dropped."

JOY PARKER
Marketing

"I had the semester system where I came from. The professors (there) were geared to the work. Fall term my grades suffered, most definitely."

ANNETTE CHILDS
Humanities

"It has affected my grades--negatively. More lab time and less class time, which gives less time for instruction in theory in the classroom and more lab work."

JIM CZARNIECKI
Electical Engineering

"None whatsoever. It's a little tougher. I had to work a lot harder to maintain my 'cume'."

JOHN SPRINGBORN
