

**Question:** How do you feel about a possible housing and tuition increase next fall?

"I think its depressing. How much tuition has gone up is unbelievable. It puts more pressure on people who support you."

Sharon Crosswaite  
Junior, Behavioral Science

"It's been going up every year, and tuition shouldn't be increased more than it already is. If they do (increase tuition) then it should be put towards student activities as opposed to general living expenses."

Jim Ely  
Senior, Business Management

"Again? It seems like it goes up every year. When I started in the fall of 1980, tuition was \$600 a trimester or \$1800 a year. Now it is \$1300 dollars a semester. It has more than doubled in four and one-half years."

Rick Fasick  
Junior, Accounting

"I don't think tuition should be raised...Although at this school tuition is relatively inexpensive. I think we should have socialized education."

Madeline Schwartz  
Graduate student

"Again? I guess if you want to go to school you have to pay it. But they ought to set a common price instead of raising it every year."

Ken Mhesam  
Senior, (non-degree)

"It makes no difference to me...in general, though, I oppose it. It's hard enough going to school the way it is."

Mike Michels  
Senior, M.D.E.T.

"It is tough...For those scrimping and saving there is not enough advance notice (with regard to past increases). If they have to, they have to, but (they should) give notice. I know people who couldn't come up with the money last year and couldn't come back."

Nancy Smith  
Senior, Accounting/Finance

"They are just keeping up with the times, but if that's the choice I'm not happy about it. There's not much you can do about it."

Mike Weaver  
Junior, Business

"I think for most students tuition is a main thing they think of. A tuition increase could be a hard problem for most students."

Qan Quan Ton  
Junior, M.D.E.T.

"I haven't really thought about it. We pay enough money as it is. I don't like it."

Bob Jurink  
Junior, Math Science
