

'Metal Fatigue' is tiresome

Allan Holdsworth is a phenom. He inspires awe in amateur guitarists and strikes terror in the souls of professional guitarists. Eddie Van Halen, perhaps the premier contemporary rock guitarist says, "Holdsworth is the best in my book. He's fantastic. I love him."

Who is this masked man? And what rock has he been hiding under?

As it turns out, Holdsworth hasn't been hiding, rather, he has been quietly melting the vinyl of various jazz/rock groups including Soft Machine, U.K., and also Bruford and Gong. While he is a legend in the guitar-playing community, the "average" listening audience hasn't heard of him. With his new album, "Metal

Fatigue," he seems to be trying to convert the heavy metal/hot guitar audience. Yet, he has failed in several aspects.

Although the guitar playing is hot, the lead vocalist, Paul Williams, and the vocal melodies leave much to be desired. A perfect example is the title track, "Metal Fatigue," which begins with a screaming guitar intro that would certainly make Van Halen jealous. It soon degenerates into an exercise of bad vocalization.

On the other hand, the album is saved by the track entitled "Devil take the Hindmost." On this track Holdsworth goes all out, displaying the guitar technique that has made him famous.

Amazingly fast, fluent, melodically complex runs are balanced by swooping feedback notes; it must be heard to be believed.

Holdsworth is a master of the modification of electric guitar sound (he doesn't employ a keyboard player). Yet, even "Panic Station," the closest thing Holdsworth has gotten to hit material, can't save him. Again, totally uninspired vocals and vocal melodies destroy an admirable attempt.

If your interested in checking out Allan Holdsworth at his best don't buy "Metal Fatigue," but his earlier album "Road Games" is great stuff. Happy Listening!!

These facts do not justify changing our designation so that Capitol can be treated differently whenever the spirit moves those in power.

We believe that Capitol students shouldn't be penalized just because they attend an upper division campus. It's ridiculous that we have to pay a \$25 fee or a fine which ever you want to call it for the indistinct privilege of parking on campus. Twenty-five dollars that students will more than likely never see again!

You can voice your opinion by signing one of the many petitions posted on campus. Don't let the greed factor rule all phases of life on campus. Sign the petition and be heard.

"is they are so old and have been so over-used that only much time and assessment of each unit could uncover the needed improvements."

"One of the big things," said South, "is to try and develop facilities as students develop their education."

Williams emphasized the hard work behind the facelift and urged students to appreciate what has been accomplished.

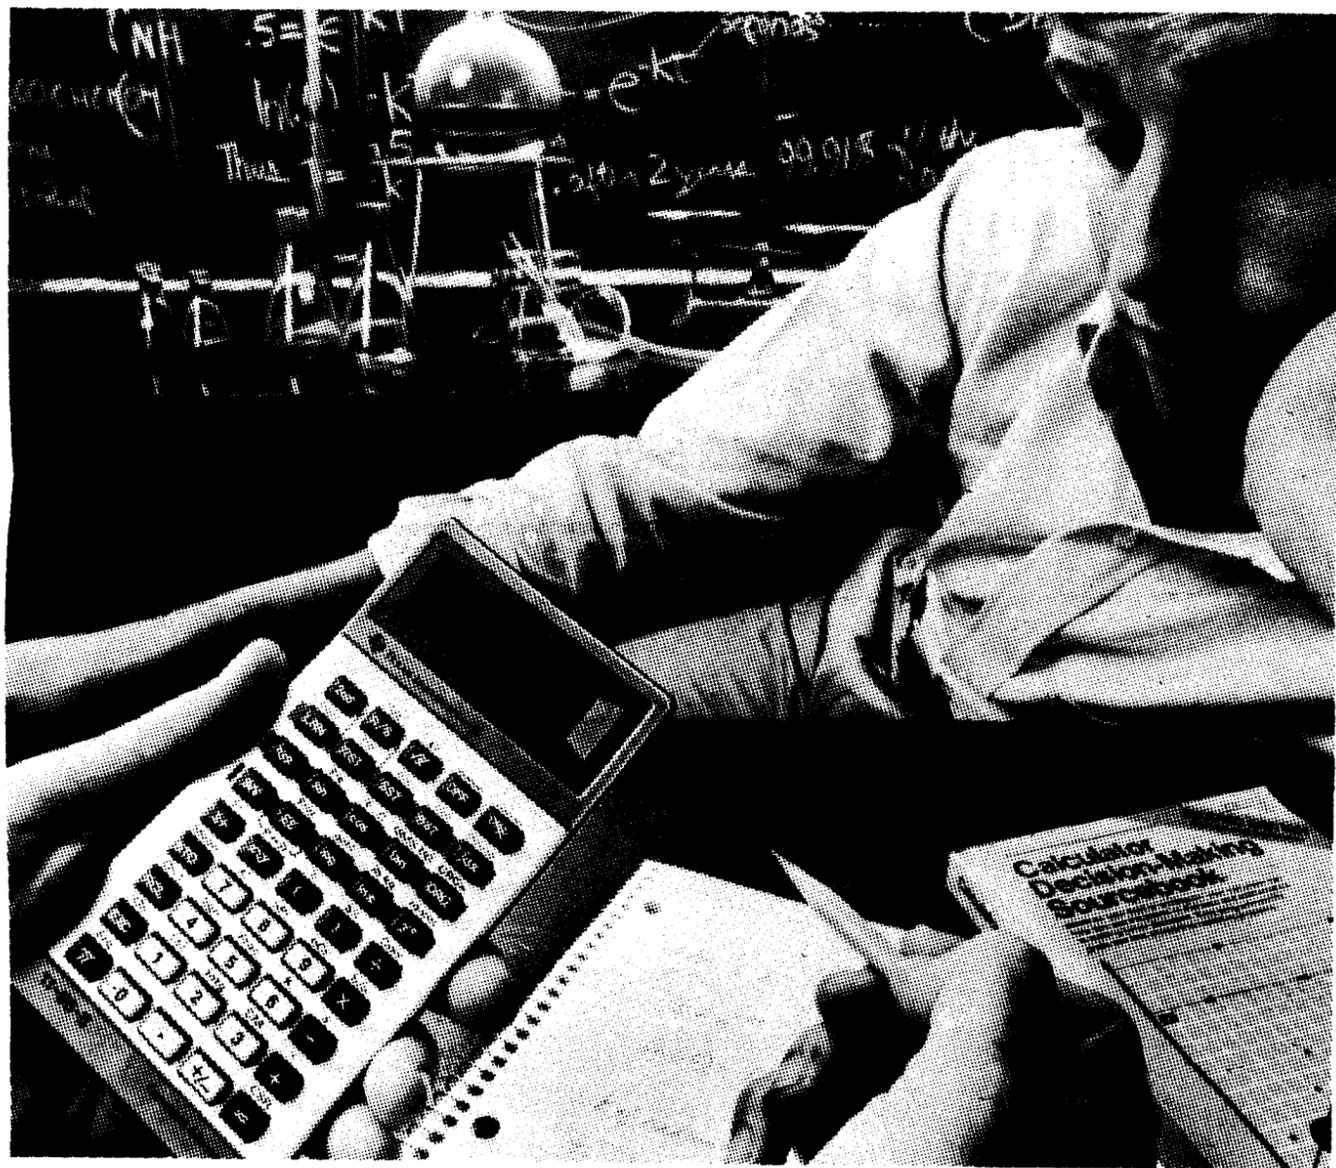

"We hope the students can appreciate what we have done thus far and we hope to do more renovations in the future," added Williams.

Letters

(continued from pg. 3)

when an individual student at the cash register gets priority over a professor calling to find out what has happened to the books for his Fall course, which he ordered in June. Or why those books were returned as overstock from the last time they were used, and now cost the student more? Does answering these questions belie a faculty oriented bookstore? Hey, we're all happy to finally have something approximating a real college bookstore. And I for one am very pleased with the new manager; I had a chance to meet her over the summer, and she is an energetic, on the ball, and pleasant woman. But please, let's work together. A quality education that students of this campus can be proud of is what we are all after. Let's not confuse the education of students with the whims of either students or faculty. Let's not confuse the education of students with the whims of either students or faculty, or with what is administratively expedient. And please, Mr Editor, let's not confuse the hardhitting and the controversial with what is merely thoughtless.

John A. Teske, Faculty

Get to the answers faster. With the TI-55-II.

What you need to tackle the higher mathematics of a science or engineering curriculum are more functions – more functions than a simple slide-rule calculator has.

Enter the TI-55-II, with 112 powerful functions. You can work faster and more accurately with the TI-55-II, because it's preprogrammed

to perform complex calculations – like definite integrals, linear regression and hyperbolics – at the touch of a button. And it can also be programmed to do repetitive problems without re-entering the entire formula.

Included is the *Calculator Decision-Making Sourcebook*. It makes the process of using

the TI-55-II even simpler, and shows you how to use all the power of the calculator.

Get to the answers faster. Let a TI-55-II show you how.
