This CD is a re-release of all The Beatles number one hits. It covers the years from 1962 to 1970. One review won't cut it, so here's three: If you're over 45, this music will cause a major life

**"GET SOMEONE OVER 45 TO EXPLAIN IT TO YOU"**

revisit. Where were you the first time you heard "She Loves You?" If you're under 30, this is a music history lesson you can't afford to miss. Get someone over 45 to explain it to you. If you're between 30 and 45 you probably understand why this album is important, but you don't have the same connection to it as the over-45s.

The world changed dramatically over the eight years it took for each of these songs to hit number one, and you can hear it in the evolution of the music, lyric content and technological quality of the songs.

Okay, I admit it. After a lifetime of listening to the dark alternative tunes, I acquiesce and can no longer pretend. Madonna IS cool. "Music" makes you move whether you've got your dancing shoes on or not, and the poppy, hip-hoppy, acoustic and electronica-produced melodies seduce you in that oh so Madonna way. No, it doesn't take a Penn

**"IT DOESN'T TAKE A PENN STATE DEGREE TO 'GET' HER SIMPLE, STRAIGHTFORWARD LYRICS"**

State degree to "get" her simple, straightforward lyrics, but who cares. It's Madonna, queen of pop culture. Stop trying to ignore her, put on your dancing shoes and go "boogie woogie" like good little boys and girls.

So we all picked stuff we liked—what do you expect when the radio guys are all on vacation?

You won't find this one pushed in your face, it's too smart for that. It's not on any charts this writer/artist knows of, but this follow-up CD to their kick-ass, stroke-of-genius *Karma* CD with chart-topping, borrowed guest, Sarah McLachlan, delivers the same great sound. The layered, new-ageish, pop-styled, electric and melodic dreamscape journeys will entice
