Scorpio

Forceful- Know this when dealing with Scorpio, and your conversation is guaranteed to go pleasantly: "Scorpio is always right!"

Listen, whether it's true or not doesn't matter, this creature is poisonous. Scorpio's passion is like venom; the intensity is deadly. They believe they are right and will do anything to make you believe that they are right.

So, avoid a stingy conversation and just go with the flow. Being around Scorpio requires you to be on your guard at all times; watch what you say!

It's not unlike Scorpio to take offense to something and want to fight back. They thrive on the power they possess and will throw it back in your face the first chance they get. **Passionate-**

Yes, Scorpio is forceful, but that is only because they are so passionate about every new idea they conjure

up. A more passive person may not understand the extent of Scorpio's passion and may even be scared off by it.

What these people have to understand is that Scorpio is harmless if they are left alone. Let them alone to work on their own projects and they won't even pay you any attention.

However, the moment you start questioning their plans or step inside their zone and watch out for their sting. Scorpio does not like to be backed into a corner, so stop stepping forward!

Exciting-

Scorpio can be a lot of fun. They are completely unpredictable and will take a crazy idea and run with it. Let's just be honest about it, it's exciting to be around Scorpio. Their eyes light up as they discuss their latest game plan.

Their work is very important to them and they diligently scurry around with one goal in mind. Scorpio just doesn't seem to take notice to anything around them because

they are too busy with their own endeavors.

Some Fashion Tips:

Scorpio's favorite word is "sexy." They can look good in just about everything because of the way they carry themselves. An old pair of sweatpants has a different meaning when worn by mysterious Scorpio. Most Scorpions don't wear any under garments! But shh... that's a secret!

Sagittarius

Optimistic-

Ok, so Sagittarius came up with this amazing business idea and decided to run with it. You have to give them credit for wanting to do something positive for a change.

Look, the world is full of negativity, so what if somebody finally sees the glass has half full instead of half empty? Sagittarius has ideas, they have the drive, and they see the light at the end of the tunnel. They have a dream that they go after, that just happens to be one of their best qualities.

Honest-

It's nice to finally talk to a real person. Sagittarius won't bull-shit you or throw a bunch of lies out there to impress you. They are very honest and straightforward people. Their underlying confidence gives them the ability to show their character right away instead of trying to hide it.

Sagittarius is not vulnerable or naive but they do believe the best in people and treat everyone with the same respect. No matter how many times Sagittarius may get burned, it doesn't seem to affect them much.

Restless-

They think way too much! Sagittarius is always on the move, they just can't seem to sit still. They want to reach their goals and see their dreams come to reality, so they will stay up until two in the morning every weekday talking on the phone to their business associates.

The problem is when they wake up at four in the morning and do it all over again. You have to sit

and wonder how it is they get their energy to do it all!

Some Fashion Tips:

Sagittarius always looks very sleek in their business-like attire. They are always on the go and must dress appropriately for every occasion. Sagittarius style is chic, yet comfortable, as they always look welcoming.

Capricorn

Practical-

Ever meet an engineer? That would be Capricorn. They are ambitious and know what that they want to have a nice life, however, they are more practical in how they are going to get there. Yep, every engineer is a planner as is Capricorn. They put their goals onto a blueprint and carefully discipline every move.

Humorous-

Capricorns take an easy pace to life and, therefore, do not have overbearing personalities. A lot of people can easily be attracted to a Capricorn. They gently enjoy

their company as Capricorns prove to be quite humorous. Their lives are already mapped out so they are not overwhelmed with a lot of stress. This lends way for Capricorn to be the life of the party!

Pessimistic-

Capricorn can be fun at times, but unlike Sagittarius, they can be extremely pessimistic. This primarily derives from their practical nature. Everything has to have a plan and if the plan doesn't make sense then it will not work out.

Big dreamers do not want to talk to a Capricorn as their chance at stardom will be easily shot down within two seconds. Life may be pretty exciting, but Capricorn only sees it as a blueprint.

Some Fashion Tips:

Capricorn dresses sensibly in mono tones. You will usually find this zodiac sign wearing collared shirts and sweaters. They are extremely conservative in the way they present themselves. Skin is a definite no-go, as they would never portray themselves in a negative manner.
