The German Reformed Church in the West.-Some time since the "Evangelist," (German) gave a statistical summary of the growth of the German Reformed Church in the West during the last ten years. The editor gave, as the result of a careful examina-tion of the subject, an increase of only six hundred members, and the actual membership of the Western Synod be computed at 14,450. One cause of this alleged limited numerical growth he said was an effort to introduce English, a proof of which he thought Shelter Island, L. I. Hungary.-Notwithstanding the imperial patent of September 1, 1859, was holly resisted by such of the Hungarian Protestants as would be content with nothing less than absolute autonomy for their church, some churches and communities, particularly among the German Evangelicals, conformed to its requisitions and took the steps preparatory to a complete reorganization of the Protestant church. The Em-peror has, however, yielded to the clamors of the opposers, so far as to withdraw the penalty of the dissolution of church courts and nullification of their acts in case of disobedience, suffering the recusants to take pretty much their own course. But not content with this, the recusants desire to make it appear that the patent itself has been abandoned, and that those communities and churches which have reorganized on its provisions are virtually where they were before. Effort is made to bring about a movement for a General Synod, which shall be entirely independent of the government. Much confusion is the result. The 'Kirchenzeitung' says that the royal letter expressly names the two superintendencies which were reorganized on the basis of the patent, with the command that they remain in their existing condition. The end of this dispute is not yet. It may be swallowed up in more general disturbances resulting in a political revolt against Austria.

The work in Cana, and Alma, and Merj Ayun continues to go on; so that Mr. Ford will need all the assistance which can be given him. Hasheiya itself, for the present, has nothing for the missionaries to do, all the Christian inhabitants being either at Damascus, Beirut, or Sidon. The Mission letter says:-"Every previous revo-

THE ECONOMY OF HEALTH.—This busy nation of Americans have 12,000,000 working people, whose services may be estimated at \$2 a day, and their annual loss by may be estimated at \$2 a day, and their annual loss by sickness at an average of ten days each in the year. This gives a total loss of \$240,000,000, a sum three times as large as the whole cost of the General Government, including the Army, Navy, Post Offices, Legislators, Foreign Ministers and all. The amount weighs over six hundred tons in pure gold.

A large proportion of this costly suffering might be averted by attention to diet, cleanliness, and above all, by the proper use of the right remedy in season. When by the proper use of the right remedy in season. When a 25 cent. box of Ayer's Pills will ayert an attack of ill-

or a dollar bottle of Ayer's Sarsaparilla, will expel a lurking disorder that would bring the sufferer to his back for weeks or months; does it take any figures to show the good economy of the investment? When Fever and Ague is rankling in your veins, and shaking your life out of you, is it worth the dollar it costs for his Acus Cure to have the villanous disorder expelled, which it does surely and quickly? When you have taken a gold is it prudent to wait until it has settled on the lungs, and remove the trouble before it is serious? It takes no

IF MEDICINE IS NECESSARY, USE BRANDRETH'S PILES. They are as pleasant as a truly effective medicine can, be. It is true you may take purgatives which will ope-rate without pain, because they take the balsamic parts from the blood, which is worse than being bled, worse than having the vital fluid abstracted. Beware of them. Brandreth's Pills only take hold of those matters which the body, when sick, wants to evacuate. They are solely an assistant of nature,—nothing more, nothing solely an assistant of nature,—nothing more, nothing less. They do not force; they merely assist; and herein is their great value. The man is thrice bic sed who is so fortunate as to be acquainted with this good and almost perfect gift to man, because he has to a great extent his body insured in health by their occasional use.
