MUSIC

SUNDAY SCHOOL.

Every superintendent and teacher knows the value of music in the Sunday School. It is one of its chief attractions and most profitable exercises. If you would have your Sunday School well attended, MAKE ITS MUSIC ATTRACTIVE. If you would have your Sunday School eans of good, make its mus Song has peculiar power to reach the heart and arous the feelings. All this is, in some measure at least understood and appreciated, and the problem, often difficult one, is how to make the music what it should

No one means is more important to this end than a good accompanying instrument. However excellent the leader may be, he needs an instrument to help him; and where the leader has not much confidence in himself, an accompanying instrument is of yet more importance. Such an instrument will attract and interest the children; will induce them to try to sing, and render it much easier for them to do so. It will add vastly to the impressiveness of the music; and, indeed, so great is its value that no Sunday School which has enjoyed the use of a good one will afterward be satisfied to do

A great difficulty in the way of the general introduc tion of accompanying instruments in Sunday Schools has been the lack of those which were both desirable and available. Such an instrument must have good quality of tone, for this is the first essential; it must have great volume or power, because it should be sufficient to guide and sustain-though not overpower -a chorus of hundreds of voices; it must occupy little space, because not many Sunday School rooms have much to spare for such a purpose; it must be durable, not liable to get out of order or out of tune; and lastnot least, practically-it must be afforded at a moderate cost, for few Sunday Schools can afford to expend a very large sum for an instrument. The melodeon has failed, chiefly because it lacked power or volume of tone; the various harmoniums, school organs, etc., have had more power, but have been deficient in quality of tone, and in other respects.

MASON & HAMLIN, having long been extensively engaged in the manufacture of Melodeons and Harmo niums-for which they have invariably taken the first premiums at all industrial fairs and exhibitions-have had constant evidence of the need of a better instru ment, such as has been described, for Sunday School. and Churches, as well as for private use. The experience of this want led them to the institution of many experiments looking to such improvements, the first important result of which was the introduction by them of the Harmonium several years since.

This instrument was an improvement upon the Me lodeon in several respects. Aiming at still better results, however, Mason & Hamlin continued their experiments, and had the satisfaction, something more than a year since, of introducing the

CABINET ORGAN,

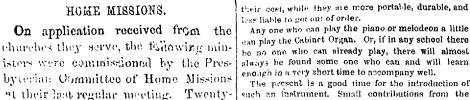

an instrument similar in many respects to the Melodeen and Harmonium, but possessing several very im-portant improvements over these instruments and all others of the general class.

The CABINET ORGAN is recommended with confi dence as admirably suited in all respects to Sunday Schools and Churches, as well as private use. Some of its prominent excellences are its pure, round, organlike tone; its great volume of tone, adapting it to the accompaniment of large numbers of voices; its capacity for expression, acising chiefly from the AUTOMATIC BELLOWS SWELL, a new invention of much more practical value than any improvement made in such instruments for many years; its compact form, its durability, and quality of keeping in tune for years; it quickness of action, adapting it to the performance of very rapid music, and its moderate cost. \$150 will procure a double reed

CABINET ORGAN

of five celeves compass, a most satisfactory instrument for any school. \$125 is the price of a double reed Organ with four octoves compass. Single reed instruments are furnished at \$95 and \$115. The larger sizes at \$280, \$400 and \$550 each, with aix, eight and twelve stops heve, of course, much more power and variety. They are at least equal in power and variety and quality of tone to the best pipe organ which can be built for double MUSIC.

their cost, while they are more portable, durable, and

The manufacturers will be glad to send post-paid to any one interested an Illustrated Catalogue, containing full particulars about these instruments, with testimony to their value from a majority of the most eminent organists and musicisns in the country. More than two hundred such have given their written opinions that they surpass all other instruments of their class in

For this purpose he has selected one of the noblest periods of the church's history, and with a graphic pen has furnished us with a work of singular interest. We heartily commend it to all, and especially to the young, as showing us how martyrs lived and died, and what our calm and peaceful religious times and privileges are worth."—Christian Instructor.

"This little book belongs to that class which, for the sake of our youth and the supply of the right sort of books for Sunday schools, we desire to see greatly multiplied. Many thrilling scenes, including the "Massacre of St. Bartholomew," instances of patient endurance, even to martyrdom, and stories of want and exile welcomed for the love of Christ, lend a more than fictitious charm to these pages. As Presbyterians, we feel a special interest in the lives and characters of these Huguenois who illustrated so well our ancestral faith."—Evangetist.

We can present a mass of

dence in proof of our assertions, that CANNOT BE DISCREDITED.

The Rev. Jacob Sechler.

Well known and much respected among the German population in this country, makes the following statement for the benefit of the afflicted.

Hanovers, Pa., Feb. 18, 1859.

Dear Sirs:—Having realized in my family important benefits from the use of your valuable preparation—Wistar's Ballang of Will Cherker—it affords me pleasure to recommend it to the public. Some eight years ago one of my daughters seemed to be in a decline, and little hopes of her recovery were entertained. I then procured a bottle of your excellent Balsam, and before she had taken the whole of the contents of the bottle there was a great improvement in her health. I have, in my individual case made frequent use of your valuable medicine, and have always been benefitted by it.

Having used in my practice the last four years, Wis-tar's Balsam of Wild Cherry, with great success, I most cheerfully recommend it to those afflicted with obsti-nate Coughs, Colds, Asthma, &c.

From Jesse Smith, Esq., President of the Morris County Bank, Morristown, New

"Having used Dr. Wistar's Balsam or Wild Cherry for about fifteen years, and having realized its beneficial results in my family, it affords me great pleasure in recommending it to the public as a valuable remedy in cases of weak lungs, colds, coughs, &c., and a remedy which I consider to be entirely innocent, and may be taken with perfect safety by the most delicate in health." From Hon. John E. Smith.

J have on several occasions used Ds. Wistar's Balsam r Willo Curry for severe colds, and always with decided benefit. I know of no preparation that is more effica-cious or more deserving of general use. The Balsam has also been used with excellent effect by J. B. Elliot, Merchant, Hall's Cross Roads, Md.

with steel portraits. Cloth extra, \$5.

Franklin offers, parhaps, the best subject for blography to be found in the annals of America. His career as a citizen, tradesman, philosopher, politician, statesman, diplomatist and author, presents a variety of incident, anecdote and history wholly without parallel. Yet, often and ably as his biography has been attempted, there cannot be said to have existed, heretofore, any really satisfactory account of his life and times.

The course pursued by previous biographers has been to give the fragmonts of autobiography. (written by Franklin for the benefit of youth,) and append to them a brief account of Franklin's public career. Mr. Parton, on the contrary, by using the autobiography amaterial conly, is enabled to employ the great mass of interesting matter relating to Franklin's early life, which is to be found in the books, newspapers and correspondence of the period. His later life also is fully related in these volumes for the first time. Besides the stores of material collected in our historical libraries, Mr. Parton has obtained much that is a beofulcy new, and much more that will be new to all but those who have made the times of Franklin an object of special research.

The publishers, who have been witnesses of the remarkable industry of the author, and the enthusiasm with which he has pursued his labors, and who have the best reasons for knowing the very high appreciation which has been placed upon his previous writings by the public, confidently believe that this work will be found one of the most interesting and permanently valuable biographies ever published. with steel portraits.
