Of the excellence of these instrumients we have, for our own part, become perfectly satisfied by frequent personal trials of the Mason & Hamlin instruments, and of various others. ## New Fashion for 1867. SHERMAN'S NEW PATENT AS YOU LIKE IT SKIRT.

This is not only a new fashion, but a new article of Skirt, made on an entirely new principle, so novel and yet so perfect that the ladies contend it should be called *Perfection*.

We would here call particular attention to the As  $1 \circ i$  Like It, or flexible joint, extending down the front of the skirt; it is so constructed that the springs fold inwardly, but not outwardly, and readily yield to the slightest pressure, thus allowing them to collapse, so that the skirt occupies the smallest possible space while sitting, riding, or in passing through a crowd, and yet, the moment the pressure is removed, the skirt resumes its original and beautiful shape.

The novelty and utility of this contrivance needs but be seen to be appreciated.

But for want of space we might here publish thousands of extracts from letters we are daily receiving, speaking in the highest praise of these Skirts.
