NOW IS THE TIME TO FORM CLUBS.

The New York Weekly Tribune

is printed on a large double-medium shaet, making eigh pages of six broad columns each. It contains all the im portant Editorials published in THE DAILY TRIBUNE except those of merely local interest; also Litérary and Scientific Intelligence; Reviews of the most interesting and important New Books; the Letters from our large corp and important New Books; the Letters from our large corp of Correspondents; the latest news received by Telegraph from Washington and all other parts of the country; summary of all important intelligence in this, city; and elsewhere; a Synopsis of the proceedings of Congress and State Legislature when in session; the Foreign News ro ceived by every steamer; Exclusive Reports of the Pro ceedings of the Farmers' Club of the American Institute ceedings of the Farmers' Gub of the American American Talks about Fruit, and other Horticultural and Agricultur al information essential to country residences; Stock, 'Fi nancial, Cattle, Dry Goods, and General Market Reports making it, both for variety and completences, altogether the

at information essential to country residences; Stock, Fri-nanceial, Cattle, Dry Goods, and General Market Reports; making it, both for variety and completences, altogether the most valuable, interesting, and instructive WEEKLY NEWSPAPER published in the world. The Full Reports of the Amer can Institute Farmers' Club, and the various Agricultural Reports, in each num-ber are richly worth a year's subscription. How are since its, commencement THE WEEKLY TRI-BUNE has been authority upon the farm. We make fea-tures of the Farmers' Club, and permit no question of in-terest to the agriculturist to pass without comment and advice. When it is remembered that this advice is given by one of the most conscientions farmers in the country, the reader may estimate its value. It has been well ob-served that a careful reading and study of the Farmers' Club Reports in [THE WEEKLY TRIBUNE] alone will save a farmer hundreds of dollars in his prop. In addi-tion to these reports we have arranged to print' the best things written on the subject of agriculture by Atterican and foreign writers. We intend to increase these features in the coming year very largely. As it is, no prudent farin the coming year very largely. As it is, no prudent far mer can do without it. As a lesson to his workmen alone every farmer should place THE WEEKLY TILBUNE

every farmer should place THE WEEKLY, TRIBUNE upon his table every Saturday evening of the state of the THE, TRIBUNE, is the best and changest paper in the country. This tot said in a spirit of boastfulness. We do not claim any essential superiority over but theighbors, ex-cept the superiority of place and opportunity. It has fai-len to New York to create the greatest newspapers of the country. Here concentrate the commerce, the manufiadcountry. Here concentrate the commerce, the inalulad-tures the mineral resources, the agricultural weath of the Republic. Here all the news gathers, and the patronage is so large that journalists can afford to print it. A news-paper can be made in New York for half the money, and yet with twice the value of newspapers elsewhere. This is the strength of THE TRIBUNE. We print the largest, and cheapest, and best-edited weekly newspaper in the country. There is little special merit in this. We have all the advantages around us. We have great Daily and Somi-Weekly editions. Their inachinory and resources are only a part of the Weekly. This paper has long had the largest circulation in America, and ye have tred to justify that confidence: The result is that we have so sys-tematized and expanded our resources that every copy of

justify that confidence: The result is that we have so sys-tematized and expanded our resources that every copy of THE WEEKLY TRIBUNE contains as much matter as a ducdecime volume. Think of it! For two dollars, the the farmer in the course of one year buys as much reading matter as though he filled a shelf of his library wilk fifty volumes, and those volumes containing the greatest works in the language. This force of cheapness can no further go. THE WEEKLY TRIBUNE is the paper of the people. Here the eager student may know the last lessons of sci-ence. Here the scholar may read reviews of the best books. Here may be found correspondence from all parts of the world; the observations of sincere and gifted men, who serve THE TRIBUNE in almost every country. All the elaborate and intricate machinery of our establishment— perhaps the most complete in America—is devoted to the perhaps the most complete in America -- is devoted to the purpose of making the best and cheapest Weekly newspa-per in the world. We think we have reached that point in giving for two dollars fifty-two duodecimo volumes a

year. THE TRIBUNE is strong by reason of its enormous cir-culation and great cheopness. It has long been conceded that THE WEEKLY TRIBUNE his the largest circula-

that THE WEBKLY TRIBUNE has the largest circula-tion in the country. For years, we have printed twice as many names, perhans: solid of the other Weeklw citizina of the city dalles combined. This is why we are enabled to do our work so thoroughly and cheaply. The larger our circulation, the better paper we can make. What are the practical suggestions? Many. Let every subscriber renew his subscription, and urge his neighbor to do the same. If a man cannot afford to pay two dollars, let him raise a club, by inducing his neighbor; to subscribé, and we shall send him a copy gratis for his trouble. No Newspaper so large and complete.as. THE WEEKLY. TRI-BUNE was ever before. offered at so have a price Furce BUNE was ever before offered at so low a price. Even BUALS was ever before othered at so low a price. Even when our Currency was at par with gold, no such paper but THE TRIBUNE was offered at that price; and THE TRI-BUNE then cost us farless than it now does. We have solved the problem of making the best and cheapest newspaper in America perhaps in the world. "Eet us see if we cannot give it a million weekly circulation.
