Guyot's Wall Maps.

Messrs. CHAS. SCRIBNER & CO. CALL THE ATTENTION OF COLLEGES, ACADEMIES, AND HIGH SCHOOLS.

TO Prof. Arnold Guyot's Classical Maps, comprising

- 1. Map of the Roman Empire. 6x8 feet, price \$15. 2. Ancient Greece (including Map of Ancient City of Athens). 6x8 " " \$10. 3. " " Italy (including Map of City of Ancient Rome). 6x8 " " \$10.

In these Maps, which are large, distinct, and engraved in the best style, the boundaries of the different States have been laid down from the latest and best authorities; and, where they were of sufficient importance, the changes at different periods have been noted. Scarcely a name of any importance mentioned in the classical authors, the location of which could be fixed, has been omitted; and no site of an ancient city has been fixed but after thorough and critical examination. Places have been laid down not merely from tradition; but, in every case where it was possible, from the latitude and longitude, as actually determined. The extensive libraries of Princeton College, and Prof. Guyot's comprehensive collection of general and special Maps, have furnished the materials for the whole subject. Not only the most recent Ancient Geography, but the accounts of modern travelers, the reports of scientific expeditions, and the special memoirs contained in the Journal of the Royal Geographical Society of England, have been constantly consulted. The Maps also contain careful and accurate plans of the cities of Athens and Rome. They are colored—as are all of Prof. Guyot's Maps—so as to indicate the physical features of the different countries, without in the least obscuring the political divisions. In short, they embrace all the distinguishing characteristics and excellences of Krieger's Maps, while they are published at a price which places them within the reach of every institution of learning in the land.

In addition to these Classical Maps, Prof. Guyot's series includes the following

WALL-MAPS FOR SCHOOLS.

By the admirable system of coloring adopted, the plateaus, mountains, valleys, rivers, altitudes, in fact all the physical characteristics of the earth's surface, are clearly and beautifully expressed in these maps; as are also the political features, boundaries, names of cities, etc., etc. Their vast superiority to all other maps is so manifestly acknowledged that no school-room which is without them can be regarded as improperly furnished.

The Court and Camp OF DAVID.

By Rev. P. C. Headley.

Three names in Sacred History stand in high pre-eminence, and mark eras in human progress, as do milestones in the pathway of travelers. Moses, David and Paul, as representative men, had each a work to accomplish from the Divine Hand, which has linked them to the destinies of our race. It is placed that scenes in imperishable history. The readers attention is invited to DAVID IN HIS COURT AND CAMP. This work was prepared to meet a felt and popular want; but few biographies have been written of this remarkable Sovereign, Hero and Poet, of ancient Israel, and these, not always in a style most happily adapted to the masses of our people. Everything, therefore, relating to David and the eventful scenes of his reign, touches a chord of deepest interest in thoughtful minds; for it stands related to Calvary and the well being of the race.

The author holds a pen of rare descriptive powers, and the work in its Scriptural and graphic style, will awaken fresh interest in the greatest General, and the grandest epoch of Hebrew history.

In its mechanical execution, nothing has been left undone to fill the eye and make it a model of excellence; printed on the toned paper, in beveled boards, full gilt, and gold lettered, with sixteen new and elegant illustrations, the work will minister to every refined taste and challenge the admiration of all lovers of the beautiful.

Sold only at Subscription Price, \$3.75. Will be ready Aug. 1.
