#### How a Decline is Produced.

Pure blood makes us well, bad blood makes us vick. Vapors from poorly digested food in the blood are condensed upon the various organs, and serve to make them grow or repair their waste Organs made with a greater or lesser proportion of such materials cannot be sound. If the bad condition of blood continues but for a few days or weeks the body will be out of sorts; and if it continues the whole of the body will in time be renewed with imperfect blood, and the health bad; it is in a decline-popularly called a consumption.

Now Brandreth's Pills penetrate the whole mass of blood, caus ing the expulsion of impurities; the body feels relieved from a single dose-what then may be expected from twenty? By continu ing their use the whole of the blood in time becomes purified, and the body reconstructed from good material, the decline stopped and a new lease of life secured Principal office, Brandreth House New York.
