The present foreign policy was more manly, and the difficulties with the U.S., inherited from the Liberal administration were likely to be settled. Dis-establishment in Ireland would avail little to secure peace with the nationalist party, who had greatly exaggerated their com-plaints. THE PACIFIC RAILROAD IN WINTER.

NATURE and the seasons seem to favor the Pacific Railroad. The working season has been so far prolonged that it is estimated that by the end of the current month there will not be over 300 miles of the Through Line remaining incomplete; and of that distance a good part of the grading will be done. The great question of fuel seems also to be satisfactorily settled. Rich beds of coal have been discovered on the head-waters of the Humboldt River, and on the slopes of the Wasatch Mountains where the Eastern and Western Links of the Road unite. Next summer will undoubtedly witness the binding of the Atlantic and Pacific waters by a continuous line of railroad 3,300 miles in

By the advertisement of the Financial Agents of the Central Pacific Railroad Company in another column, it appears that great success has attended their negotiations of the First Mortgage Bonds, issued under the aurhority of Congress. The important aid granted by the nation, together with excellent credit, enables this Company to push on the work with undiminished vigor. Fifteen thousand men and three thousand teams are engaged on the line. Three hundred miles of iron have been laid since the 20th of June last; or at an average rate of two and one half miles per working day. From Salt Lake to the Pacific Ocean the line rises once only (in crossing the Sierra-Nevada Range), to the altitude of heavy snows. Over this stretch of about thirty miles, subtantial sheds have been built which will enable the line to be worked at all seasons, in spite of drifting snows. The business on the Paci-fic end of the line is already greater than the present facilities will accommodate.

From the Watchman & Reflector, Sept. 17, 1868.] ADVERTISING may almost be said to be resolving itself, by careful method, into a science. It is certainly becoming an assumed necessity of the enterprising business man, with whom success by every proper, legitimate means is regarded a duty. Among the honorable and efficient men engaged actively and prosperously in the advertising business, we can refer advisedly to Mr. T. C. Evans, Boston, who has earned in this calling a reputation that is itself wealth, for it inspires confidence in all with whom he has dealings, who are many, and confidence is a prime requisite in all business relations.

Musical Doings.—Since Mr. Horace. Waters gave up publishing sheet music he has devoted his whole capital and attention to the manufacture and sale of Pianos and Melodeons. He has just issued a catalogue of his new instruments, giving a new scale of prices, which shows a marked reduction from former rates, and his Pianos have recently been awarded the First Premium at several Fairs. Many people of the present day, who are attracted, if not confused, with the flaming advertisements of rival in not contused, with the flaming advertisements of rival piano houses, probably overlook a modest manufacturer like Mr. Waters; but we happen to know that his instruments earned him a good reputation long before Expositions and the "honors" connected therewith were ever thought of; indeed, we have one of Mr. Waters' pianofortes now in our residence (where it has stood for years,) of which any manufacturer in the world might well be proud. We have always been delighted with it as a sweet-loned and noweful instrument and there is no doubt one toned and powerful instrument, and there is no doubt of its durability; more than this, some of the best amateur players in the city, as several celebrated planists, have performed on the said plano, and all pronounced it a superior and first-class instrument.
