Waltham Watches

That the American Watch is superior in accuracy as a time keeper, and in substantial value, to its imported rivals, is now generally conceded by the intelligent.

The question now is: "Which is the best American Watch?" Then follows: "Which thoroughly good watch is really the cheapest?" We answer:

The Waltham Watches have stood the test of time, and they are the original set of American watch-making. The idea of making our own watches, and making each piece of machinery specially adapted thereto, so that a piece lost or broken may surely be replaced by a similar piece from any other watch of its class, or one ordered from the manufactory on purpose, originated here; and here it has been carried to perfection.

The success of the American Watch has incited several attempts at rivalry, which are now in full and vigorous progress. All of these are hopeful, and will doubtless improve with experience and the lapse of time.

So constant and signal have been the improvements in machinery at the Waltham manufactory, that the Company have not only been enabled to make better and better Watches, but they now sell them for fewer dollars in greenbacks than they cost in gold before the war.
