

While every affirmative vote evidently contains an answer to the categorical question distinctly pointed out in the first requirement of the vote covers the more general form of the vote covers the whole plan, with a majority sufficiently large to give it constitutional sanction.

It was objected by Henry Day, Esq., that the State Clerk in this report had not acted as the New York Assembly directed, in his sending down the whole Report of the Joint Committee on Reunion, instead of only the formal overture on Reunion which it contained, and that this had been the cause of much of the ambiguity shown in the replies.

Dr. McGill replied that the resolutions ordered him to submit "the Plan of Union," and that the truth required him to specify these variations in the replies handed him. He declared that not one half the Presbyteries had reported categorical answers in regard to Reunion. A prolonged discussion arose, most speakers taking ground against Dr. McGill. Finally Mr. Day's motion to strike out of the Report the part in regard to variations in the answers was adopted unanimously.

The organization of a Presbytery of Colorado, extending over Colorado, Utah, Montana, and Wyoming, was ordered. The programme for Friday was announced. Invitations to meet in May in the west Spruce and West Arch street churches, were received and declined with thanks. The Union of the Synods of Kansas was reported.

The Report of the Joint Committee on Reunion [the same as made in our column last week] was received and unanimously adopted. The following special Committees were appointed under it: On Reconstruction—Rev. George W. Musgrave, D. D., Rev. G. C. Beatty, D. D., Rev. Cyrus Dickson, D. D., and Ruling Elders Henry Day, and W. M. Francis.

On Board of Foreign Missions—Rev. J. C. Lowrie, D. D., Rev. W. M. Paxton, D. D., Rev. S. F. Scovell, and Ruling Elders Judge J. B. Skinner and Judge Martin Ryerson.

On Board of Domestic Missions—Rev. G. W. Musgrave, D. D., Rev. D. A. Cunningham, Rev. D. McKinney, D. D., Rev. J. Trumbull Backus, D. D., and Ruling Elder H. D. Gregory.

How Hostetter's Bitters cure Dyspepsia THE WHOLE STORY IN A NUTSHELL. The office of the stomach is to convert the food into a cream-like fluid, called chyme. This is effected partly by the action of a solvent, called the gastric juice, which exudes from the coating of the stomach, and partly by a mechanical movement of that organ, which churns, as it were, the dissolving aliment.

Now, it is evident that if the great solvent, the gastric juice, is not produced in sufficient quantity, or if its mechanical action of the stomach is not sufficiently brisk, the first process of digestion will be but imperfectly performed. It is also clear that if the liver, which secretes such an important part in changing the nourishing portion of the chyme into the material of the blood, is congested, or in any unnatural condition, the process will not be thoroughly accomplished.

A Blind Adherence to Old Ideas is absurd in this age of the brilliant discoveries. When an invalid can drink the actual counterpart of the famous Seltzer Water in his own chamber, why should he do himself with revolting cathartics? TARRANT'S Seltzer Aperient is the equivalent of that peerless combination of alternative and tonic elements, and is admitted to have no equal in the materia medica as a remedy for indigestion, biliousness, general weakness, constipation, and tendency of blood to the head.

TO CONSUMPTIVES. THE Advertiser, having been restored to health in a few weeks, by a very simple remedy, after having suffered several years with a severe lung affection, and that dread disease, Consumption—is anxious to make known to his fellow sufferers the means of cure.

OFFICE OF FISK & HATCH, BANKERS AND DEALERS IN GOVERNMENT SECURITIES. No. 5 Nassau Street, New York. November 5, 1869.

To our Customers and Correspondents: The surprising development of our national resources and the rapidly with which the government is now enabled to reduce the national debt, by weekly purchases, render it apparent that the time is approaching when the Five-Twenty bonds may be funded at not over four or four and a half per cent. interest.

Meanwhile their high price, as compared with other classes of securities paying an equal rate of interest, is leading to general inquiry for more profitable forms of investment in which money may be safely invested. During the war the necessities and peril of the government, and the consequent cheapness of its securities, rendered them so attractive that, from this cause, combined with the patriotic faith of the people in their safety, they absorbed almost the entire floating capital of the country, and diverted attention from other classes of securities which had before been deemed unattractively conservative and sound to meet the wants of the most cautious investors.

The government is no longer a borrower. It no longer needs the country's capital, but desires rather to honorably to repay it. The rapid accumulation of capital for investment, and the reduction of the national debt and improvement of the national credit—rendering it certain that hereafter a comparatively low rate of interest can be derived from investment in government bonds—is compelling the search for other safe and well-guarded channels into which capital not employed in business may wisely flow.

The enterprises of Peace, no less useful in their time and place, for the common welfare, than were the waste and cost of War, now call for the capital which the Government no longer needs, and offer for its use a remuneration which the Government need no longer pay, and in some cases, a security as stable and enduring as the faith of the nation itself.

The desire to capitalize the premium which may be realized upon Five-Twenty bonds, and which a material decline in Gold toward par, and the ability of the Government to fund them at a lower rate of interest, may at any time extinguish, is felt by many holders who desire some satisfactory assurance as to which of the many low-priced securities in the market would afford the necessary safety to justify an exchange.

The applications for information and advice which are addressed to us daily, show how universal is the desire for this assurance, as to what forms of investment more profitable than Government securities at present market rates, are entitled to the confidence of investors.

The pressure of this want has led us to feel the importance of directing our own attention as bankers, our large experience, and our facilities for obtaining reliable information—to the work of supplying it in some measure, and to offer the results of our inquiries to those who may be disposed to confide in our good faith and judgment.

We are unwilling to offer to our friends and the public anything which according to our best judgment is not as secure as the national obligations themselves, with which we have hitherto principally identified ourselves.

Since closing the GREAT CENTRAL PACIFIC RAILROAD LOAN, which meets all these requirements, we have carefully examined many others, but have found no other which would fully do, until the following was placed in our hands: FIRST MORTGAGE SIX PER CENT. GOLD BONDS OF THE WESTERN PACIFIC R. R. CO. OF CALIFORNIA. The Western Pacific Railroad connecting Sacramento with San Francisco, furnishes the final link in the extraordinary fact of an unbroken line of rail from the shore of the Atlantic to that of the Pacific. It is 150 miles in length, including a short branch, and it will be the METROPOLITAN LINE OF THE PACIFIC COAST, connecting its chief cities, and traversing the garden of the rich and growing State of California, receiving, in addition to an immense and lucrative local traffic, the through business over the Union and Central Pacific Railroads—between the Eastern States and Sacramento.
