How to INVEST MONEY .- Many of our readers, in common with a very large class of people having money to invest, desire satisfactory assurance as to which of the multitude of securities offered in the market are worthy of their confidence.

The Government, by weekly purchases of its own bonds is now releasing invested capital at the rate of over one hundred millions per annum. The majority of this capital thus being released is of the class that avoids speculative and business risks and seek safe investment, with a reasonable income. Meanwhile, the general prosperity of the country is leading to rapid accumulations of similar capital in the hands of prudent people, who desire to have it seurely invested.

As all cannot make close investigation for themselves, but must rely to some extent upon the judgment and experience of others, it is of very great importance that the best authorities in\* such matters should be pointed out.

We are happy to be able to say that from a long personal acquaintance with Messrs Fisk & Hatch, and their principles of business, we believe their judgment to be so good, and their discrimination as to what they offer and recommend for investment so scrupulous and conscientious, that their consent to negotiate a loan may be feceived as very satisfactory evidence of its soundness and value.—Hear/h. and Home.
