NEW HANGOUT

SAME HANGUP

With the opening of the Rub Building, the pinochle and euchre addicts of the Behrend Campus have been presented with a brand new and somewhat fancier environment in which to pursue their pennybetting, sticky-fingered, card-playing habit. Instead of having to scrounge for a solid chair, and a table with all four of the legs the same length, our benevolent Big Brother at State has provided us with both; plus a few fringe benefits such as atmosphere, ash trays, etc. All jokes aside, the RUB is a beautiful

and useful addition to our campus which provides adequate spaces, facilities for our previously cramped or crowded activities.

The longest, sloppiest, whitest, and coldest term of the academic year is in full swing, and will be made more bearable by the fact that the Rub is now usable. In a sense it has become a winter haven for the students.

The RUB provides a new hang-out to pursue our same old hang-ups.
