

TWO-YEAR TECH STUDENTS BEING INTERVIEWED

By Lois Carper

The fourth semester drafting and electrical technology students are being interviewed for permanent jobs, which they will take after graduation. Some of the corporations holding the interviews are in Hazleton; others are as far away as California.

The first of these was held at Highacres by Link Aviation Company of New York. The representative of this company, which makes the link trainer used in instructing pilots, was here about two weeks ago.

The Goodyear Tire and Rubber Company and the Armco Steel Corporation, both from Ohio, have sent applications which have been filled out and returned. The actual interviews will come later at the plants of these two companies. The Armco Company is opening a new division and is interested in the designing and development of new steel buildings.

On March 30, students were interviewed by Mr. Baldwin and Mr. Tnda of North American Aviation Inc., of California, which manufactures guided missels.

Mr. Eskroth, the personnel manager of Dorr-Oliver, Inc., of Hazleton, will interview students on April 5 and 6. The Dorr-Oliver Company is a manufacture of ~~commercial~~ and industrial filters, used in water filtration, sewage disposal and sugar manufacturing, to mention only a few.

In the near future, interviews will be held in the electronic division of the Curtis Wright plant, which makes synthetic electronic flight instructing equipment. Applications have been returned and the interviews will be held at Carlstadt, New Jersey. Arrangements are also being made for future interviews by Champ Hats Inc., of Sunbury. As far as is now known, the last group of interviews will be held on April 20, by Mr. Bacon of the General Electric Co.

By Art Teel

Last Monday, the first Leadership Lab of the semester was held. Cadets were organized into flights and some time was spent on marching instructions. This lab will be held each Monday during the 9th period for the remainder of the semester, weather permitting.

Due to the fact that Capt. Carper was unable to be present for the Thursday classes, there will be a Sophomore ROTC class held on Monday, 5th period.

APRIL FOOLS DAY

Today is that cr-aazy day when people try to make bigger fools of themselves and each other than they do the other 364 days of the year. This they try to acheive by playing pranks on each other. The victim of a practical joke is an April Fool. We thought it might be interesting to find out whether any of the students here at Highacres were ever the victims of April Fools jokes, so we asked a few of them the question: "Were you ever an April Fool?"

Theresa Bobowski---Yes, I was. One April 1, a boy called me up and asked me for a date, and I accepted thinking it was some of my girl friends playing a joke. At eight o'clock that evening, as I was sitting around in old clothes, the doorbell rang and I found that I had made a real date.
