

"TILL THEN"

We realize that both the parking lot and the cafeteria here at Highacres are overcrowded as a result of the tremendous increase in enrollment this semester. The possible solutions to these problems - further expansion of the parking lot and a student Union Building - while important issues here at Highacres cannot possibly be taken care of until sufficient time has been allotted for solving them. Until that time the student body must make some adjustments to handle our overcrowded facilities.

Parking at the bottom of the hill must be done carefully to allow everyone ample room. A careless driver can, by disorderly parking, take up a space which normally should be used by two cars. He may also box in another car so completely that it will be impossible for the other driver to leave.

The Traffic Committee - if it is efficient - should be concerned with all our traffic problems and not just parking at the top of the hill. By any standards the fact that over 150 drivers are daily inconvenienced by insufficient room is as serious as that some cars must be parked in the driveway of the upper lot. Any driver who persists in unfair parking in the lot, will be fined on the same basis as those who park illegally.

Since the cafeteria is overcrowded, arrangements should be made to ease conditions during noon time. As soon as you finish your lunch you are asked to leave your seat in the cafeteria for someone else. Some people have solved the cafeteria problem by eating their lunches in their cars down at the parking lot.

"Till Then" (con't)

While we have no idea how the administration views this practice, we will ask these students to be a little more careful about the manner in which they dispose of their refuse. They are asked not to litter the parking lot with lunch bags and newspaper, but to put their empty lunch bags in garbage containers. The Traffic Committee should see about having trash containers placed down at the parking lot for these students.

2 IS COMPANY, 3 a CROWD

This year, up on the main campus, the official enrollment listed 9697 men and 2956 women. This is a ratio of 3.28 men to one girl (which sort of crowds things). Last year it was company (2.92 to 1), with 8946 men to 3057 women. This is the first time in years that the ratio has been so great.
