#### ACCOUNTING STUDENTS HEAR SPEAKER

Mr. James T. Meehan, District Manager of the Hazleton Social Security office, spoke to the combined accounting classes on Tuesday morning November 15. He talked on the role of 'Old Age and Survivors Insurance' in our present economy.

Beginning his talk, Mr. Meehan explained what we mean by Federal Old Age and Survivors Insurance. "It is protection for you and your family based on your earnings, in work covered by the Federal Social Security Law."

Mr. Meehan then brought before the class the importance of obtaining social security cards and told them that as future accountants, they should always be sure to see that every person on the payroll receives a social security card.

He spoke about the payments of benefits to widows and dependant children under the age of 18. The amount of the payment the widow and children receive is computed on the number of quarters, from 1951 to the present, that social security has been deducted from the total wages paid.

If a man at the age of 65 receives social security benefits, his wife also being over 65, will receive one half of the amount that her husband receives.

If the husband dies, the widow will receive \$60 of three-fourths of the amount received by her husband before his death.

At the close of the period, Mr. Meehan conducted a question and answer period, clarifying many of the questions which the students asked.
