OPERA TRIP

It has been called to the attention of the Collegian that a combined group, made up of students of the Music 5 class and members of the Highacres College Community Chorus, is planning a field trip to the Hershey Community Theatre for Saturday evening, October 27, to hear Puccini's Madame Butterfly, which will be presented by the Fujiwara Opera Company of Japan.

Several years ago when the Fujiwara Opera Company made its first appearance in America, they received accolades with the New York Times calling their appearance, "a rare experience in the theatre." Mr. John McClintock, well-known educator in private and public schools says, "my wife, who was in charge under General MacArthur of all service clubs in Japan and Korea for six years, tells me that when she heard this opera company in Tokyo, it was terrific."

The group planning this trip is enthusiastic, and final preparations have been completed.

TECHNOTES

by Joann Kenvin

On Saturday, Oct. 30, Miss Theresa Misto became the bride of Thomas Mlasgar. Tom is a third-semester student in the D. D. T. curriculum at Highacres. The student body extends its congratulations.

Thomas Dougherty, E. Tech., Class of 1956, recently paid his former instructors a pleasant surprise visit. Tom works for the Bell Telephone laboratories in Murray Hill, N. J. and enjoys his work immensely.

Pete Timinsky, E. Tech Class of 1956, and Joseph Plesniarski, D. Tech. Class of 1956, have written highly informative, humorous, well-written letters to their former instructors, telling of their work and life in the Motor City, where they are affiliated with General Motors. It seems that the nucleus of a Highacres Alumni Association may be in the making.

Edward Smith, James Raul and James Hoblitzell, current tech students, recently made a tour of the P. P. and L. plant at Sunbury. They expressed favorable comments on the facilities and personnel and recommend the excursion for interested students.

BIOLOGY CONTEST

Mr. James Steel, Prof. of Biology at Highacres, wishes to announce a contest open to all students at the campus. The object of the contest is to provide a name for the newly acquired female skeleton of the Biology Department. Names must be written along with a short statement of why the student believes the name to be appropriate and handed to Mr. Steel before November 13 th.

First prize in the contest will be a giant amoeba while nine Proglottids will be awarded to the runner-ups. The decision of the judges will be final and no entries will be returned.
