

COLLEGE LIFE?

What is needed for a well-rounded college life? This question may be a problem to many students.

It is true, all college students are primarily interested in receiving a higher degree of education, in preparation for their future. This motive should be first on your list when you think of college life.

Extra-curricular activities take a second place in importance in college life, nevertheless, these are of great importance. A person must have an outlet of some sort for the things he enjoys doing. This, of course, does not pertain to the academic side of college life.

STOP! think of some of the values there are in belonging to an extra-curricular activity. Will I get anything in return for giving my time to a club or a certain organization? Am I just wasting time, or is there some sign of creativeness and progress in what I am doing? Am I partaking in this organization on my own accord, or is there someone forcing me into these activities?

These are a few things one may ask himself before joining an organization.

Keeping these questions in mind, run through this list of High Acres extra-curricular Activities and see if you can find at least one activity that interests you.
