LOBBYING

Little Orville's mother sent her precious child to attend public school. She gave the teacher a long list of instructions: "My son is so sensitive," she explained. "Don't ever punish him. Just slap the boy next to him. That will frighten Orville."

THE BOOK SHELF

The Enemy Within by Robert Kennedy

This is a no-holds-barred report on the work of the McClellan Committee. It tells how they fell afoul hood and uncovered a shocking story of venality, greed, corruption, and naivete for power in the ranks of both labor and management. Written crisply, with information but also humor, Kennedy has told a creditable story of the committee's work and of the revelation that not only led to the ouster of important union leaders and resulted in a healthy number of convictions but also laid the basis for a sorely needed new labor law.

John Kennedy by James MacGregor Burns

In this first full length biography of a forceful new personality of the national political scene, James MacGregor Burns traces Kennedy's background and political development in direct, vivid, forthright narration that shows Kennedy as revealed at every turn, his personality and principles, as well as the kind of administration he would be likely to see if elected President.

Richard Nixon by Earl Mazo

This book presents an inside view of the administration of Nixon's relations with his chief, Lyndon Johnson, Dulles, Congress, John Kennedy, and others; it indicates how Nixon would behave in the executive chair; it shows unrevealed aspects of Nixon's personality.

Anyone concerned with American politics in 1960 will find these two biographies invaluable and absorbing reading.
