

Underprivileged children given happy Christmas holiday

The annual Christmas party for the underprivileged children of the Hazleton area was held Sunday, December 20 in the Student Union Building.

The Christmas party which was sponsored by the Student Government Association, The Theta Sigma Pi Sorority, the Delta Delta Tau Fraternity, and the Veteran's Fraternity has been in existence for quite a few years. Each year the party attendance has grown since the children in the Hazleton area look forward to this annual event.

This year eight children from the United Charities, the Catholic Charities, the Salvation Army and the Luzerne County Board of Assistance were in attendance. Each received toys from Santa Claus who made the children's day a happy one.

Food was a very special highlight of the afternoon. Each child could be seen

waiting in line for the food which was prepared by the sorority members.

As four o'clock came and the party ended, each child returned home loaded down

with toys and goodies. As one could see in the eyes of the children, the Penn State celebration of Christmas was a prosperous and merry one for all.

NEWLY-ELECTED OFFICERS of the Veterans' Fraternity are (from left): John Benavage, secretary-treasurer, Tom Caccese, president, and Joe Matteo, vice-president.

New econ course

UNIVERSITY PARK, Pa.—A new economics course designed to take students to the problems of the city rather than bring the problems of the city to the students has been launched at The Pennsylvania State University.

Entitled 'Advanced Economic Analysis-Urban Economics,' the upper level program reverses the usual procedure, taking students out of the classroom and putting them in real life city operation for observation and on-the-spot inquiry.

"Most often in the classroom a student is introduced to a set of analytical tools and then a pre-selected problem is presented for which these tools are applicable," says the course originator, Dr. Bernard H. Booms, assistant professor of economics.

"Seldom, if ever, is the student required to find a problem on his own and then determine which of the tools he is familiar with will help in analyzing the problem."

Goal of the new program is to give students a chance to tie abstract scholarship to real world situations by actually visiting on a regular basis the cities they are examining, then coming back to the classroom and applying the appropriate tools learned from the textbook.

Special emphasis in the study will be given to industry location, residential location, the effects of racial segregation, the behavior of housing markets, the impact of taxes and urban services on location decisions, and the urban transportation problem.

"Well,—mostly I ate EGGS."

Peace

BROCKPORT, N.Y.—The State University of New York, College at Brockport is looking for students who want to earn college credit while preparing to teach mathematics and science as Peace Corps volunteers in Latin America.

The program is open to students who are in good standing at any accredited college or university and who will have completed their sophomore or junior year by June, 1971.

Applications must be made to the Peace Corps/College Degree Program; State University College at Brockport; Brockport, New York 14420 by March 1.

The program is designed to fill the need for mathematics and science teachers in developing Latin American countries. It includes one academic year flanked by two summers of fully subsidized and integrated academic courses and Peace Corps training.

Graduates receive either an A.B. or B.S. degree, secondary school teacher certification and an assignment overseas to a bi-national educational team as a Peace Corps volunteer. While they are serving overseas, volunteers may earn up to 12 hours of graduate credit.

According to Peace Corps officials, the Brockport program is the only one in the country to grant full academic credit for Peace Corps training.

ACHTUNG, STUDENTEN!

You need not be language majors to participate in Penn State's study abroad programs!

The following paragraphs contain pertinent information to make all students aware of Penn State's Study Abroad programs, which are sponsored by the Office of Foreign Studies, 211-212, Engineering C, University Park.

The University's study abroad programs, which are open to students of all colleges in the University, enable students to enrich their on-campus studies through an academic experience and crosscultural contacts in a foreign country. (Especially encouraged to participate are students majoring in Political science, sociology, art history and languages.)

In order to meet the needs of students with different language backgrounds, Penn State study programs have been established in the University of Strasbourg (France), Cologne (Germany), Salamanca (Spain), Rome (Italy), and San Jose (Costa Rica). The University has entered into a cooperative relationship with these above-mentioned universities to establish general studies programs involving courses of study in the humanities and in the social sciences developed especially for Penn State juniors to provide elective credit in these areas. These courses are taught by foreign professors in the foreign language (except in Rome, where instruction is conducted in English) and focus upon pertinent aspects of the history and the social, political, economic, and educational systems of the host country. All students will be required to include foreign language instruction in their study programs.

In addition, specialized programs have been established for students majoring in architecture, art history, communications, education, fine art, and landscape architecture. These programs are sponsored by academic departments. Eligible students who wish to apply should contact the appropriate department.

No transfer of credit is necessary since students remain registered at the Pennsylvania State University.

UNIVERSITIES OF COLOGNE, SALAMANCA, and STRASBOURG.

Duration: 14 weeks beginning with spring term; a 4-week intensive language course followed by 10 weeks of course work in various subjects conducted entirely in the foreign language. Credit: 12 credits can be earned. Costs: The one-term Penn State tuition will cover instructional fees for the entire 14-week program. Program participants will be charged \$320 for room and board for the 10-week term. Besides, they will be charged \$128, i.e. \$32 per week, for the four extra weeks. Additional expenses are round-trip travel and a fee of \$35. Course Requirements: Selectees must have at least 15 credits in the foreign language or the equivalent, and must have completed History 19 and 3 credits in Political science, preferably Pl. Sc. 20 or 14. In addition, art history 110 is required of those who apply for study in Strasbourg or Salamanca.

UNIVERSIDAD de COSTA RICA in SAN JOSE. Penn State has established a cooperative relationship in San Jose, offering courses of study developed especially for Penn State students. The curriculum includes courses in the social sciences and in the Spanish language. Taught by Costa Rican professors in the Spanish language, the courses will focus upon pertinent aspects of contemporary Latin America. Duration: 10 weeks (winter term). Credit: 9 credits can be earned. Course requirements: In addition to at least 3 credits in Spanish beyond the intermediate level or the equivalent, selectees must have completed, prior to departure, at least 3 credits in political science, preferably Pl. Sc. 14. History 23 is strongly recommended.

UNIVERSITY OF ROME. Duration: 10 weeks (spring term) of academic instruction (conducted in English) coinciding with the regular Penn State spring term. Credit: 10 credits, taught by Italian professors, in Italian, art history, and in additional course work yet to be determined. Course requirements: 8 credits in Italian and art history 110. Costs for both San Jose and Rome.

The costs of the 10 week study will be approximately the same as the costs of a term at Penn State, with the addition of round-trip travel and a program fee of \$35.

Round trip to your destination: \$250-\$270.

In Europe a Penn State faculty member will be responsible for supervision and administration of the programs. He will be assisted by a resident coordinator who is responsible for course arrangements, housing, library and seminar facilities, social functions and field trips.

Living arrangements: Every effort will be made to avoid the isolation of Penn State students as a separate group. Direct contact with local people and their culture will be an important phase of the study programs. It is planned that students will reside in private homes and in University dormitories. Homes will be carefully selected, in order to provide satisfactory living arrangements. In Rome, however it is planned that students will reside in a carefully selected pensions or boarding house. Parents and students should be aware, however, that there will not be the same type of supervision of the living arrangements which is available at the University Park campus. Students will be responsible for the arrangement of their person and conduct to a much greater extent than is customary at Penn State.

SELECTION OF STUDENTS: (a) students should have an all-University average of at least 2.50, must be in good standing, and must show evidence of maturity, stability, self-discipline, and strong academic motivation, (b) final selection will be made by the Director of the Office of Foreign Studies and the Committee on Foreign Studies, in consultation with the student's academic adviser, (c) applications will be accepted and considered from students during their sophomore year, but no later than May 1 prior to the year of departure.

For applications and further information contact Mr. Pierucci in M-208.

Sorority changes

The Theta Sigma Pi Sorority has undergone some changes since Fall Term. Mary Polasick was elected President to fill the vacancy left by Denise O'Bremski who transferred to University Park. Janet Marcolina was elected Vice-President.

The sorority is selling leather bracelets and necklaces in the back of the SUB, in order to raise money for the May Ball. Orders are also being taken.

Plans for the future include working at the Veteran's Fraternity Spaghetti Dinner, having an ice skating or tobogganing party, and a covered dish supper for the Delta Delta Tau Fraternity.
