

## **HELP WANTED FRESHMEN**

### **1975-'76 Collegian Staff**

### **Searching for New Members**

### **Editor-in-Chief, Managing Editor**

### **Production manager**

### **Slots to be filled**

The staff of the 1974-75 Collegian is searching for new staff members for next year's Collegian staff.

Unfilled positions on the board of directors include editor-in-chief, managing editor, and production manager. Any interested freshman should contact the Collegian office as soon as possible. A sense of organization and leadership qualities are needed for these positions. A student in drafting would probably be the best bet for production manager, as a sense of composition will be needed.

Managing editor is in charge of all news on campus, and is responsible for assigning reporters to newsworthy items on campus and in the community.

## **High Demand for Engineering Grads**

Demand is high for graduates of the two engineering technology associate degree programs offered by the College of Earth and Mineral Sciences at The Pennsylvania State University, reports Dr. Willard Miller, associate dean for resident instruction in the College.

Mining technology, offered at the University's Fayette Campus, Uniontown, since Monaca, since 1967, is the only two-year metallurgy program in the country.

Graduates of both these programs are reporting no trouble in finding employment at very good salaries, according to Dr. Miller.

The 25 mining technology graduates last year averaged more than \$1,000 a month in starting salaries, he says,

The positions of sports editor, feature editor, photographer, and a number of other jobs are also still waiting to be filled.

Freshmen, this is your campus now. The sophomores are leaving, taking with them the majority of the Collegian staff. If you want a newspaper next year, YOU are going to have to do something about it. No one can keep this paper going but you.

Don't let us down. Don't let yourself down. Anyone who is interested should report to the Collegian office as soon as possible.

Don't be shy. We won't bite you. And we don't require that you have any previous experience, either. We can teach you.

and the five graduates in metallurgy were easily placed at salaries ranging from \$900 to \$1,100 a month. And there were more jobs available than there were two-year graduates to fill them.

Currently, the mining technology program has the largest enrollment in its history with 81 full-time students and 55 adjunct students, many of whom are studying part-time while holding full-time jobs.

Both programs prepare students for positions in industry "between the graduate engineer on one hand and the skilled worker on the other," Dr. Miller points out. And both, he says, have been accredited organization for engineering and engineering technology curricula.

## **LEBANON ARTS FESTIVAL**

Interested in music, art, poetry, dance or screening? All this and more can be yours at the very reasonable cost of nothing this April 24, 25, 26 and 27 at the Lebanon Valley College Spring Arts Festival

College Spring Arts Festival. All things get started Thursday night when two members of the music faculty combine talents of four hands on one piano.

College and community have joined together to form one of the most outstanding Arts Festivals in Pennsylvania. Exhibits, workshops and concerts are scheduled to make this weekend explode with activity.

Anyone interested in performing or exhibiting is asked to write to Spring Arts Festival, Lebanon Valley College, Annville, Pa., or call 717-867-4411, ext. 317.

## **Peach Jammy**

### **April 27**

Do you often go home on weekends because there's nothing to do? Well, on Sunday April 27th there will be an outdoor jammy by the group Peach. The action will take place behind the dorm on the lawn, providing plenty of space for everyone. Peach, which has been together for about three years, consists of four members who formally attended Highacres. They have played at such places as Wilkes College, Kings College and at nightclubs all around the East Coast. They bill themselves as a rock-dance group and the group's leader, Joe Falatko, expressed enthusiasm about playing at the campus. So, get your friends, frisbees or whatever and make it to the Jammy. Who knows, this could be the start of something! Hope to see ya there.
