

# LETTERS TO THE EDITOR

## Well-Rounded

### Complaint

To The Editor:

Recently a Resident Hall Assistant resigned from his position. The Residence Hall staff therefore realized the need to fill the vacancy as soon as possible. Arthur Boyce secretly selected a student to take this position.

The Residence Hall staff, in all fairness, should have made a general announcement so that all interested persons would have an opportunity to apply for the position; especially those students who submitted applications previously and were eliminated in the election process. We feel that an equal opportunity should have been given to everyone because the person who was secretly selected was not one of the original students who submitted an application.

Weber. Perhaps this abandonment of learning as a life-long adventure says something about our society rather than our educational system. It has become very difficult for a person to absorb a significant fraction of our greatly expanded body of knowledge. This may not only make the possibility of being a Renaissance man archaic, but also necessitates long and specialized study just to become a competent engineer.
