

## Paula Callery appointed Regional Director

HAZLETON, PA - November 7, 1991 ... Paula Callery has been appointed Regional Director of Development and University Relations for Penn State's Northeast Region that includes the Hazleton, Wilkes-Barre and Worthington Scranton campuses. Since joining Penn State in 1985, she had been Director of University Relations at the Hazleton Campus.

In her new position, Callery will be responsible for developing and coordinating a unified approach to long-range development activities, developing and coordinating marketing, advertising, publications and public information plans both at the Hazleton Campus and at Wilkes-Barre and Worthington Scranton campuses, and working with the Regional Director of Continuing Education and the Office of Development and University Relations at University Park. She will serve on the Development and University Relations Advisory Council for Penn State's Commonwealth Educational

System, and be responsible for overall leadership, coordinating and training of Development and University Relations personnel, programs, activities, and regional budgets of the Northeast Regional Campuses.

Prior to joining Penn State, Callery had been Director of Broadcast Funding for public television at Howard University in Washington, D. C., and Director of Public Affairs for Science and Technology during the Carter Administration. She had a long career with the IBM Corporation in public affairs and government relations, and was economic development consultant to the Atlanta, Georgia Department of Community and Human Development.

At Penn State, Callery is a member of the campus executive committee, marketing board, and economic development, cultural diversity, and campus development advisory committees. Active in Hazleton as well, she is

a board member of the Greater Hazleton YWCA and Leadership Hazleton. She has served as a facilitator for Leadership Hazleton programs for the past four years. She is also a member of the Hazleton League of Women Voters, the Northeast Pennsylvania Economic Development Council, the Hazleton Area Management Club, the Penn State Club of Greater Hazleton, and past board member of the Hazleton Red Cross.

She is a member of the National Society of Fund Raising Executives, the Council for Advancement and Support of Education, and a past member of the Council on Urban Economic Development.

Her office will continue to be at the Penn State Hazleton Campus.

### Sosar and Graham win council seats

by Michael T. Jesky

With a startling 76 percent turnout in Tuesday's election, Dr. David Sosar and Mrs. Evelyn Graham captured city council seats, giving mayor John Quigley an important voting majority on the Hazleton City Council for the first time since he took office four years ago.

Quigley, the democratic incumbent, won the mayoral nod over John Ford by an unofficial 61/39 split.

Dr. David Sosar is an instructor in political science and teaches part-time at Penn State Hazleton. He resides in Hazleton.

Mrs. Evelyn Graham is most notably affiliated with Penn State due to her contribution toward the Evelyn Graham Academic Building, and has been actively participating in local politics for years.

## Dr. Gregory hosts trip to the Franklin Institute of Science

by Gina Hammond

On Friday October 25, Dr. Gregory took a busload of honors and psychology students from Penn State's Hazleton and Wilkes Barre campuses to the Franklin Institute of Science in Philadelphia. The bus ride to the institute was relatively uneventful due to the sleepiness of the students and the early departure of bus at 8:00 a.m.

While waiting to enter the Optic Theater students heard many passing people speak of their experiences in the heart. As rumors of a clogged artery filtered throughout the museum, we couldn't wait to explore the situation ourselves. First, however, we viewed "The Ring of Fire" in the Optic Theater, a movie which unfolds the secrets of the volcanos.

When we approached the heart we saw the infamous clog. As we got

closer to the main artery we realized it was not a clog, but an overweight man who had gotten stuck trying to make his way through the very narrow passage ways.

As we continued our exploration of the museum we decided to visit "The Secrets of the Stars", a planetarium show. This was more to our liking because there were no screaming children in side this theater as opposed to the other parts of the museum. Unfortunately, there were more children than ever in Future World asking about exhibits such as the satellite phone.

If you would like to know anything more about this fun and exciting museum, go see it for yourself. However, avoid the kids: Don't go on a Friday and set aside lots of time, you'll need it. Words just can't express our enjoyment!

Last day to late drop  
classes is  
Wed., Nov. 13!!!
