HAZLETON COLLEGIAN

page 2

NEW BOWLING LEAGUE STARTED

Every Monday night at the Hazleton YNCA a newly organized bowling league is knocking them down in thunderous style. The league was organized by Mr. Harold R. Wausat, director of physical education and athletics. Members are paying 20 cents per game. Mr. Wausat has announced that Thursday night also may be open for another college league. Anyone interested in a Thursday night bowling date is advised to tell Mr. Wausat.

SPRING IS HERE: ADVICE FROM AN OLD-TIMER.

As the warm breezes pass over Highacres and chase away the cold northeastern winter blasts, a feeling of easy living affects the college student. His mind turns from his studies to fishing, hiking, and thoughts of love. The only book you will most likely find him reading will be literature, especially books of poetry concerning spring and love. But if we force ourselves to spend our time also in absorbing knowledge of formulae, nuclei, manias, and business cycles, and keeping up with our classes, Spring Fever can't result in weakening our semester grades. So let's not become lax now --with June just ahead -- but keep fighting and we shall find the time goes much faster until we shall be out taking life easy.

UISS GARBRICK RETURNS QUICKLY

Miss Pearl Garbrick, we are glad to report, is back with us after a short surgery session st St. Josephs Hospital. She had a spot of annoying scar tissue removed from her lower lip and is much pleased with the result.

MRS. LONGO ON THE MEND

After having been ill for the past two weeks, and at present in St. Josephs Hospital, Mrs. John Longo is convalescing and expecting to resume her usual activities next week. In the meantime Mr. W. R. Grubbs is teaching her class in Composition O.

IF YOU ARE IN SPRING TRAINING, READ THIS

Men and women who are now in spring training for the coming baseball season are being informed that Highacres has a good athletic field conveniently located and not hemmed in by plate-glass windows, pedestrians, cars and lawn. There the throwing arm and the batting swing can be loosened up and grooved all-out. Trainees will not be distracted or hampered by the hazards of glass, people, vehicles, and the danger of digging divots from a lawn such as the one fronting the main building or the one in the garden below the picture window in the lounge. These lawns are being readied for May Day and the crowning of the Queen.
