

COMMUTERS' SHELTER COMPLETED

One of the newest improvements to the campus is the commuters' shelter which has been constructed at the entrance to the school. Construction of the shelter, and improvement which has been in the making for a number of years, was begun in mid-August and completed just after the fall semester began. The purpose of the shelter is two-fold. First, it is to provide cover during the inclement weather for those who are commuting; second, it is to improve the looks of the entrance and make it more outstanding to passers-by. The area around the shelter is yet to be landscaped, a job which will have to wait until next spring. Also, there is to be a new sign. Erection of the sign has been postponed until the final word about changing the College name comes through. If it is decided to change the name of the College, the Hazleton Center hopes to be first to use the new name.

The shelter was erected at a cost of \$1,100. Money for the construction was appropriated by the Hazleton Educational Council from a fund which they administer. The shelter was designed by Mr. Merle E. Campbell, and he drew the plans from which contractor John F. Zeisloft worked.

SORORITY NEWS

On Thursday evening, November 5, the Theta Sigma Pi Sorority held its monthly business meeting with President Harriet Tulin presiding. Plans were discussed to hold a bake sale in Deisroth's Department Store basement on Saturday, December 5. Each member was asked to make a contribution, either money or baked goods.

The Sorority Tea and Supper were discussed, and dates were set aside for them. The Tea will be held Sunday, December 6, and the Supper will be held in January. Mothers are invited to the Tea.

At the next meeting, the Sorority is featuring a speaker. After the meeting, refreshments will be served. All girls are asked to attend.

COLLEGE ARTS SOCIETY

Another meeting of the College Arts Society was held Friday. Plans for the presentation of a movie were further discussed. It was also decided to include Dramatics on the agenda for the year.

It is hoped that with Mr. Wilcox's able help, a dramatic presentation will be possible later in the year.

CAMPUS ROADS ARE CLEARED FOR ACTION

Everyone wants to thank Harold Michaels, our hard working snow plowman for the job he did keeping the highway leading to the Center open and ready for action with traffic on Monday morning. This was no small task, for it took eight hours of plowing over the week-end, to get everything clear of the snow. This usually does not take so long, but the storm Friday was especially heavy, making the job much harder. Luckily, the warm sun melted much of the remaining snow, eliminating the need for cinders. For those of you who have been parking your cars in the lot and have been burning your clutch out trying to drive around that mound of snow in the middle of the area, be happy about it. The College went out and hired a tractor to come in and scrape the snow away from the cleared area, allowing you to park there Monday. We all have had our first taste of the snow so let's hope that everything goes as well again as it did this last time, and that our roads are plowed as effectively as now.

John Coyne and Burgess Faux also worked through most of Saturday and Sunday, to get the campus ready for Monday's classes.
