The Pennsylvania State University

LION'S

Delaware County Campus

Vol. I, No. 1

CHESTER, PENNSYLVANIA

November, 1968

EDITORS NAMED TO FILL POSTS

lected as temporary editors on the staff of THE LION'S EYE. The students were selected by Mr. Biscontini through interviews and submission of written material.

Permanent editors for each section, as well as an editor-in-chief and a business manager, will be selected by the staff members themselves when the newspaper becomes a chartered organization. It is now functioning as a committee of the SGA.

The staff members of THE LION'S EYE are:

News: Joan Scanlon, editor; John Capice, Joe DeCostanza, Naomi Gifford, Beth Pfeffer, Nancy Nipon, Joanne Freedman, Phyllis Taylor, and Eileen Moran.

Editorial: Nancy Stoicovich, Maria Infante, Dave Berger, editors; Joe Bacanskas, Earl Smith, Paula Levin, Linda Ryncavage, and Dom Iacono.

Photography: George Lewis and Cooperson, editors; Smith, Jim West, Barbara Rozycki, Edgar Hollingsworth, Jacqueline Wiggins, Sharon Miles, and Barry McLaughlin.

Sports: Vaughn Morrison and Tim Rumsey, editors; Harry Triolo, Barry Reddish, Gerald Hansel, and Don McCormick.

Arts and Entertainment: Yvonne Butler, editor; Carolyn Hayward, Fred Schray, Irene Hancox, Mike Weintraub, and John Powell.

Features and Layout: Sandra School, has been named assist Morgan, editor; Chris Watson, to the dean of student affairs. Nora Anderson, Ginny Roberts, Frank Gorbey, Sally Petrosky, Trena Hamlet and Maureen Fin-

JOB DIRECTORY WILL BE IN LIBRARY

The Delaware County Campus is in the process of compiling a directory which contains the names of business firms needing part-time employees.

The types of jobs available will be listed along with the necessary information for contacting specific employers.

The directory will be placed in the library for student use and will not be charged out.

Students interested in summer or part-time work in specific areas might make suggestions to the administration that these areas be included in the directory.

ENGINEERING GRANT

The campus received its first grant in the sum of \$3,000 from United Engineers and Construction Company of Philadelphia. The grant was for the development and support of a mechanical engineering technology program lated by the engineering faculty.

THIS COULD BE THE START OF SOMETHING BIG: Architect's sketch for the first building of the new Delaware County Campus in Middletown Township. Architect is Harbeson, Hough, Livingston and Larson of Philadelphia.

President Walker Attends Groundbreaking

Mrs. Anne Karmatz, a former teacher at Collingdale High School, has been named assistant

Mrs. Anne Karmatz

Before accepting the new position, Mrs. Karmatz had been an administrative assistant to the director of the Delaware County Campus.

As assistant to Dean Linder, Mrs. Karmatz will be responsible for coordinating extracurricular student activities and for workat the campus. Plans for use of ing closely with women students the money are now being formu- on problems of an academic nature.

The Penn State Family Day was highlighted by President Walker's appearance at the groundbreaking ceremonies for the new campus site in Middletown Township.

President Walker joined other University officials and wellknown county figures in throwing the first spades of dirt, signaling the beginning of the new construction project. The actual work on construction of the first building was scheduled to begin several days after the groundbreaking.

Joining President Walker in wishing the new campus well were Judge Louis A. Bloom, president of the campus advisory board; Frank Snear, chairman of the county commissioners; John D. Vairo, director of the campus; Arthur I. Martindale, chairman of the faculty, and Vincent Simoni, president of the Student Government Association.

About 200 people attended the

Later in the day, several hundred people visited the Chester campus where they had the opportunity to tour the present facility and meet with faculty and staff members.

The first building for the new campus, scheduled for completion by the Fall of 1970, will be a three-story brick structure housing classrooms and administrative offices, a library, auditorium and science laboratories.

Additional buildings scheduled for the site include a library, gymnasium, student union building and more classroom buildings. The building will accommodate about 1,500 students.

The 50-acre tract of land was county commissioners last year. at Pattee Library.

New telefacsimile devices now link the library at the Delaware County Campus with Pattee Library at University Park, enabling local students to receive material quickly from the vast resources at the larger library. The network is the first in the country to be considered completely successful.

The Telecopier, recently installed here, can transmit or receive a standard size document at the rate of one page every six minutes. A page placed in a machine at one location is reproduced exactly at another location. The message is transmitted over telephone lines.

The Pattee Library and its branches at University Park contain more than one million volumes. By using the telefacsimile device, material needed at a Commonwealth campus is rapidly made available to students at distant locations. The machines have now been installed at 18 of the 20 Commonwealth Campuses.

Most of the transmitting originates at the University Park Library facilities since most of the needed material is in the onemillion volume collection at Pattee. It is possible, however, for one Commonwealth Campus to contact another.

The facilities are also available to industry through the Pennsylvania Technical Assistance progiven to the University by the gram (PENNTAP), administered

County and two from Philadelphia are the apparent low bidders on construction projects for the new campus of The Pennsylvania State University's Delaware County Campus. Bids were received October 3 by the University and were opened October 10 at the

The apparent low bidders and the bids they submitted are The Welsbach Corp., Philadelphia, general contracting, \$964,900; H. Gold, Inc., Philadelphia, plumbing, \$189,576; Randeb, Inc., Springfield, heating, \$266,810; and Rite-Way Electric, Media, electrical, \$161,-

Thirty firms submitted bids on the various aspects of the construction of the new campus. Harbeson, Hough, Livingston and Larson, a Philadelphia firm, is the architect for the building.

Groundbreaking for the building was held on November 17 and campus administration officials hope that construction will begin shortly

The three-story brick building will include classrooms, laboratories, general administrative offices, an auditorium and a library. It will be built on a 50-acre tract at Middletown and Yearsley Mill Roads, Middletown Township. The land was deeded to Penn State by the Delaware County commissioners last year.

LION'S EYE IS LATE; POLICIES ESTABLISHED

The first issue of THE LION'S EYE is late so we'd best get the apologies out of the way early.

The lateness is due to the fact that the campus had no money to support the journalistic venture. The appointment of Mr. Biscontini as public information officer at the campus, did not come until mid-summer, much too late to submit a request for funds. Until his appointment, it was doubtful that student journalists would have an academic advisor for a newspaper who was experienced in such matters.

The second reason for the lateness is that practically none of the student writers had any journalistic training. We're learning as we go and we'll be calling ourselves professionals in no time.

Editorial Policy Explained

Some of our contributors sport sideburns, beards, sandals and long hair; others wear wellpressed shirts and Y.A.F. buttons. We're a "liberal" newspaper in the true sense of the world. We want to hear (and print) everyone's thoughts and philosophies. The only stipulations we make are that the contributor's contributions are factual, in good taste and professionally executed.

There are no censors on THE LION'S EYE staff. We'll leave
