Going to Happy Valley Soon?

Before heading up to University Park, you should check out the supplies you might be needing for "Dorm" living. Answer the following questions to see if you are prepared for dormitory living.

1. How many items and supplies you need?
 a. 0-15 b. 16-30 c. 31-48 d. 48 and up
2. How much money do you think you will need?
 a. 0-200 b. 201-500 c. 501-800 d. 800-plus
3. What of the following should you look for when buying necessities for dorm living?
 a. Portability, color, price, b. Price, portability and practicality c. Practicality, color, portability
4. Which of the following is absolutely necessary?
 a. calculator, b. stereo c. typewriter d. refrigerator

Dorm Living Costs Answers

1. d. 43 and up 2. d. \$800 and up 3. b. Price, portability, and practicality 4. c. typewriter — otherwise you might pay a typist between \$1.50 and \$3.00 per page.

Typewriters run in price from between \$90.00 for a manual portable to \$400 for an electric with a correction mechanism.

Calculators are available in price from between \$10.00 — \$40.00. Texas Instruments sell the 7130 and the 7235 which handle logarithms, pi, roots, and powers. Business Majors may want to get the Texas Instrument Business Analyst, which can handle compounds, interest, gross profit margins and investment yields. Engineers and Computer Science Majors may want to get a programmable calculator and prices start at \$50.00.

Compact stereos or matched components run from between \$200.00 and \$600.00. Refrigerators can most frequently be larger than 3 cubic feet. The prices range from between \$100 to \$300. Refrigerators can also be rented for about half the price. The capacity of these refrigerators does not go much beyond two six packs. A West Bend Hot Pot costs \$2.00 to \$6.00. This electric container can heat liquids from soup to instant coffee.

Once the student sleeps through an exam, he learns the value of an alarm clock. A windable or quartz battery clock may be of better use than electric because of frequent college blackouts from overloaded circuits. For proper illumination, a reading lamp that can provide light for reading at your desk or in bed may be a wise purchase.

It is foolish to spend thousands of dollars on an education without investing \$12.00 in a dictionary or \$2.00 Rogets Pocket Thesaurus.

Smile . . . Jimmy Carter loves you!

P-Nut Day Held

by Maryanna Savage

"Peanut Day" was officially at this campus on October 1 in commemoration of President Carter's fifty-sixth birthday. To celebrate, everything was given a peanut flare. The cafeteria special of the day was peanut butter and jelly sandwiches with peanut butter crackers for dessert. Tem-Tee Nuts of Havertown supplied peanuts which were sold throughout the day at twenty-five cents a bag.

Special events included a peanut aerial show given by Paul Glessner as he flew over the campus and dropped peanuts out of an airplane to the volleyball area. The guest star appearance by Mr. Peanut, alias Shawn Padgett, culminated the day's activities. Mr. Peanut made visits to all the offices, the library, and the student lounge, accepting birthday wishes on behalf of Mr. Carter.

Proceeds from the peanut and sandwich sales will benefit the Undergraduate Student Association for the various activities and events which the organization runs throughout the school year.

In Other Eyes . . .

The following stories appeared in the October 11th issue of the Lion's Eye.

. . . Fall Term enrollment at the University total 53,680 students — a record high — according to preliminary figures announced to the Board of Trustees.

. . . Caution: Disco dancing may be hazardous to your feet! "Twenty-five percent of the ankle sprains and bursitis-type foot problems we see today are related to dancing," notes Dr. Joseph D'Amico, chairman of New York College of Podiatric Medicine's Division of Orthopedic Sciences, in a recent issue of *Us Magazine*. D'Amico cited three sources of disco foot: slippery dance floors, bizarre footwear (platform shoes and

stiletto heels), and a simple lack of preparation. The doctor notes that dancing is a maximum stress situation and shouldn't be done without warm-up exercises.

. . . New York — Professor John Buettner-Janusch, chairman of the anthropology department at New York University, recruited students to work with him in a school lab making quaaludes, LSD, synthetic cocaine and other drugs he later sold for huge profits, according to a federal grand jury indictment returned this week.

. . . Pope John Paul II visited Philadelphia on October 3 — just one stop for the Pontiff during his week-long tour of several American cities.

University Policy

Odd/Even

The Lion's Eye has learned that University officials had contemplated initiating the following policy during Summer Term 1979.

MEMORANDUM TO: All Departments
SUBJECT: Odd/Even Restroom use
DATE: Summer, 1979

Effective immediately, those employees who have social security numbers ending with even numbers will be allowed to use the restrooms on even days. Those with social security numbers ending with odd numbers will use the restrooms on odd-numbered days. The 31st of any month is a free day and anyone will be allowed to use the restrooms.

Visitors, tourists, heavy beer drinkers, and those with bladder or medical problems may apply to the Personnel Department for a "P" sticker which will exempt them from procedures.

Finally, please note that employees must be able to prove that they have a half a tank to be allowed to use the facilities.

Career Trouble?

by Linda Dougherty

There is a place on our campus that not too many students are aware of a place where they can find the help they need in choosing a career. The Career Development and Placement Center, located in the Student Affairs modular building, is designed to assist students in career planning. The center is equipped with books and pamphlets as well as audio-visual aids to help in that critical, inevitable decision of a career.

Stop in and ask for Counselor, Steve Sciscione, if you are having trouble choosing a career. It shouldn't hurt and maybe you'll come out with a better understanding of what you really want to do.
