ful and relatively low in price. They seem likely to stay plentiful, what with improved production methods on new crops and extensive storage on old.

"Conversely, practically business indicators suggest continued good demand for meat demand for méat remaining high. the meat packing industry looks to the immediate future with more hope than for some time"

He explained that fixed processing and distributing costs in labor and plant facilities in the meat industry have risen 37 per a higher volume of meat processed, however, the cost per

Profit Showing Dismal

"The meat industry has made a dismal showing, profit-wise, in recent years," Foster noted, adding: "Perhaps now, with improved plant facilities and larger volume of sales to reduce costs, we shall be able to do better."

He said the Institute, comprising companies which turn out more than 85 per cent of the nation's total meat, had worked diligently during the year to advance the popularity of meat in the diet. Pork, especially, received great emphasis because it was in a relatively weaker position than other meats.

The Institute recommended that pork processors trim the fat more closely from retail cuts to make them more attractive to shopping housewives. Numerous consumer surveys had showed a marked preference for lean pork, Foster said, leading to the first major change in meat processing in recent years.

Great Strides in Research

Great strides also were made in research on frozen prepackaged meats, nutrition, meat pres aged meats, nutrition, mean ervation and by-products, the Chairman added. On the meat production end, Foster said the 1955 total of about 268 billion lbs topped the previous year's record of 253 billion. The per capita consumption of 161 lbs in 1955 was second only to the 1633 lbs in 1908.

Most of the rise was in pork, which amounted to approximately 11 billion lbs in 1955 as compared with about 10 billion the year before. Per capita consumption of pork rose from 597 lbs o 66 ls in the year.

With heavy supplies, prices on live hogs plummeted in the ast half of the year to the lowest since before Pearl Harbor Heavy bunching of hog shipments unusually early in the marketing season accounted for a share of the decline, Foster

Production of beef edged up about 2 per cent, from 13 billion lbs to 13.6 billion, in 1955, and beef consumption per person reached a record 81 lbs from

Consumption of pork per person in 1956 may rise about a lb, he predicted, while beef is expected to be about two lbs lower and veal, lamb and mutton off small fractions. This would make for a slight reduction in the per capita consumption to around 160.5 lbs, but the larger population factor accounts for the predicted larger total meat produc-tion of 27.2 billion lbs.

Lancaster Farming, Friday, December 30, 1955-3

One of the most demanded musical groups in Lancaster County is the Holstein Quartet, an aggregation from the Lampeter-Strasburg High School. Recently the foursome ranked in the top five at the International Livestock Exposition's Four-H Club Congress. Here they are in action at the recent. Production Credit Administration-National Farm Loan Administration meeting in Mount Joy. Members of the foursome are Raymond Denlinger, R4 Lancaster; John Stoner, R7 Lancaster; Stanley Long-enecker, R1 Strasburg and Aaron Landis, R1 Strasburg. (Lancaster Farming Staff Photo).

Ruth E. Herr Crowned 1956 Apple Queen

Miss Ruth E. Herr, 19-year-old daughter of Mr. and Mrs Robert Herr, RD2 Lancaster, Tuesday night was crowned Apple Queen of Lancaster County.

She will represent the County in the state contest at York Jan. 31. Miss Priscilla Weaver, Birdın-Hand, last year's queen, crowned the new royalty in ceremonies at the North Queen Street Branch of the Lancaster County National Bank.

Her parents operate a large fruit farm near Mountville.

Miss Herr is a graduate of Manor High School, and is now a sophomore at the Pennsylvania State University, majoring in secondary education, Spanish and English.
