

Phone Building Concrete Poured

The weather was snowy, the ground was white, but nothing stopped the Sordoni Construction Co. when it was time to pour ready-mix concrete at the new Pennsylvania Community Telephone Co. Building in Quarryville. Luther Davis, construction superintendent, heads the crew. Here the east wall is starting to rise.

Dirt excavated for the basement of the Quarryville Building is being hauled to Kirkwood and Penn Hill for fills where other new Exchanges are under construction by the Telephone Company. Tuesday

the cutover to dial is scheduled for Atglen and Gap, which with the Quarryville, Kirkwood and Penn Hill projects will extend further rural telephone service in the southern end of Lancaster County and the southwestern corner of Chester County.

Workmen here report frost and frozen ground has been no great problem, although other projects underway by the company elsewhere in Pennsylvania have been delayed, and some suspended until Spring because of frozen ground. (Lancaster Farming Photo.)

WHICH IS WHICH?

Along those lines, you've probably heard about the couple of recruits who were bird hunting when one of them shouted to the other that he found a dead animal on the road.

"It's got three stripes," he yelled.

"Leave him lay," shouted back his partner. "It's either a skunk or a sergeant?"
