John C. Colombo, Architect

House No. A-118

Modern Split-Level

HERE is a home in the modern manner—a brick and siding, split-level beauty. There's a maximum of living comforts packed into this design. The huge living room is complemented by a rear picture window and the cheerful fireplace. The separate dining room adjoins the kitchen-dinette. Up a short flight of stairs there are three bedrooms. Besides having its own private bathroom, the master bedroom has a closet along one entire wall. For relaxation, entertaining or watching TV, there is a playroom, only a few steps away from the living area. There is another fireplace in this room and an entrance to the outdoors. An extra bedroom and bath on this level is ideal for a maid or guests. Don't overlook that large basement, so handy for storage, hobbies, or a workshop.

A king-sized sketch plan of this house is available to readers. Simply send 25c in coin to Modern Plan Service, Department 118, Lincoln Building, Mt. Vernon, N.Y.

Changes in Beef Grades Due June 1

WASHINGTON — (USDA) — The Commercial grade of beef will be divided into two new grades designated as Standard and Commercial, the U. S. Department of Agriculture announced today. The present grades for beef are Prime, Choice, Good, Commercial, Utility, Cutter and Canner. The new grades will become effective June 1, 1956.

The division of the present Commercial grade is being made on the basis of maturity and the grade name "Standard" will be applied to beef from younger animals of the grade. The name "Commercial" will be retained for beef from mature animals falling in the present Commercial grade.

Proposed in November
This revision was originally

recommended by the Cattle and Beef Industry Committee and was published as a proposal in the November 15, 1955, Federal Register. Comments were received on the proposal for a period of 60 days. A substantial majority of the comments received from individuals and organizations was in favor of the proposal as published.

The present Commercial grade includes carcasses from animals within the full range of maturity as animals are marketed. It differs in this respect from the Prime, Choice and Good grades which are restricted to carcasses from relatively young cattle.

Increase Efficiency

It was the opinion of the Committee that it is impractical to merchandise, under the same grade designation, beef from young animals which may qualify for the Commercial grade with only a small quantity of fat together with beef from much older animals which is required to have a much greater degree of fatness. Also in some sections of the country where substantial

portions of the younger type of Commercial beef are produced and consumed, it is believed that some of this type of beef is not now being federally graded because of prejudice against the name "Commercial" which has come to be associated with beef from older animals.

It was the Committee's opinion that, if Commercial beef as produced from young cattle were segregated from that produced from older cattle and also given an appropriate name, a greater proportion of the younger beef would be federally graded. This would result in increasing the marketing efficiency for meat of this grade and be beneficial to both producer and consumer.

Not many employers have to worry lest an employe works too hard

Logan Chicks Go To Haiti by Plane

The second shipment of Logan Baby Chicks from Kennett Square, consigned to Larimer Mellon, Jr. for the Albert Schweitzer Hospital left Idlewild International Airport by Pan American World Airways early today and will arrive in Port-au-Prince later today.

An article "Miracle of the Spirit" in the April issue of Reader's Digest, tells what Larry Mellon is doing for the people of Haiti. Mr. Logan has received much satisfaction in knowing chicks he has produced in Chester County have had some small part in this great work.

WALL OVEN NEEDS PLENTY OF SPACE

In the kitchen where wall space is at a premium, a wall oven may not be practical, points out Doris L. Snook, extension home management specialist of the Pennsylvania State University.

Divided units take more space than a range. The surface unit takes about the same amount of space as burners on a range. But the oven takes an area that could be used for counters.

A wall oven also needs a counter at least 24 inches long right beside it. So unless a kitchen has plenty of space, a divided unit could prove inconvenient.
