ANOTHER SERVICE BATTLE? BREWS IN ELECTION YEAR

WASHINGTON, June 7 —The lid is about ready to come off another sizzling interservice wrangle in Washington and this being an election year there are

those on Capitol Hill ready to make the most of it

This time it is not solely a case of a conspiracy against policy. It centers around a dispute over the capabilities of certain weapons and of course, it touches on the role to be played by various services, also, in the air.

The Air Force is involved in the middle, and is in the unfortunate position of being the youngest of services getting the most money and stirring up the most envy among top brass in the other two, older services.

The Army, under General Maxwell Taylor, is taking on new theoretical function. The Navy, having won its carrier battle some years back, is fighting for a major role in strategic warfare. The Navy is winning this battle.

But the case isn't settled yet. President Eisenhower is an old Army man. And although most top Air Force officers are too, the Chief Executive wants the Army to have a fair hearing. And he doesn't want to have a big row over defense weapons in an election year or any other time, for that matter.

Also entering into the happy picture at this time is a difference of opinion as to the Navy's capabilities to maintain a strategic bombing offensive with its huge carriers. How much the Navy can contribute in such a sustained offensive is a matter now being thrashed out between service brass and Congressmen, but there is a difference of opinion on this among Air Force and Navy officers.

President Eisenhower formally backed the Democrats' "pay-as-you-go" principle for highway financing, abandoning his own controversial bond issue plan.

Put your finger on faster broiler growth at lower cost

There's a NEW LOOK in broiler feeds

Beacon's 1956 Broiler Feeds have produced cockerels weighing 3 40 lbs in 8 weeks on only 2 02 pounds of Beacon Feed per pound of weight. Difficult to duplicate under field conditions. BUT a goal to work toward Beacon research tests are made year after year under controlled feeding and management conditions enabling us to measure comparative improvement. Now the greater efficiency of these new rations has been proven in the field. Their entirely new energy-protein-vitamin relationship is bringing lower costs to growers in 13 states.

YOU CAN GROW FOR LESS. Let New Beacon Broiler Feeds improve weights and cut feeding costs. To come closer to TOP results . . . to have the lowest cost yet . . . you need the Beacon Program too . . . chicks bred for rapid meat production . . . extra feeders . . . extra fountains . . . 1 sq ft per bird . . . strict sanitation . . . and the care that spells good management. It pays in profits.

Beacon high quality ingredients . . . PLUS Beacon "know how" formulation give you more for your money in poultry feeds. Never before has Beacon had such an advanced broiler feed improvement so clearly superior.

Experienced Beacon field servicemen will help you get the lowest broiler costs you ever had. Just drop a note and say, "Have the Beacon man call."

Philadelphia Milk Marketing Order Changed

WASHINGTON — (USDA) — Some of the provisions of the Philadelphia Federal milk marketing order are being changed by amendments, the U. S. Department of Agriculture announced today. The amended order will go into effect June 1, 1956. The amending order:

1. Bring under regulation any plant which supplies Class I milk to the market during any of the months of February through September. This change replaces a provision exempting any plant that delivered less than 25,000 pounds a month of milk allocated to Class I during any of these months.

2. Changes the regulations applying to handlers supplying the Philadelphia market and other federally regulated markets. A handler regulated under the New York order who supplies milk to both New York and Philadelphia will continue to be regulated under the New York order; a handler supplying milk to both Wilmington and Philadelphia will be regulated under the Philadelphia order; other Philadelphia handlers who supply a greater volume of milk to any other Federal milk marketing area than they supply to Philadelphia and who are regulated under the order of the other area will not be regulated under the Philadelphia order.

3. Repeals the provisions covering special pricing of milk sold outside the Philadelphia area (excepting milk sold in the New York market) so that all such milk is priced in the same way.

4. Makes more precise the method of determining whether milk shall go into Class I or Class II.

5. Clarifies the language on the allocation of milk to various class uses.

The amend order is based on evidence received at a public hearing in Philadelphia, February 1-7, 1956. The U. S. Department of Agriculture submitted recommended amendments to producers and handlers for exceptions on April 5. Exceptions were considered in framing final recommendations

Price Index on Farm Off; Eggs And Milk Down

HARRISBURG — The index of price received by Pennsylvania farmers for their principal products dropped one point, or less than 1 per cent, during the month ended May 15, the State Department of Agriculture announced today. Further declines in prices to farmers for milk and eggs again were responsible for the drop, a Federal-State survey revealed. The Pennsylvania index now stands at 228 per cent of its 1910-14 average, six points below May a year ago, the Department said.

National Average Up
Each month this year has showed a decline in the Pennsylvania farm price index, a total drop of 16 points since December 15, the Department said. Price drops in milk and eggs have accounted for most of the decline, the Department said.

Nationally, the index of prices received by farmers for the month ended May 15 showed an advance of seven points or three per cent, the survey showed.

The Pennsylvania crop index registered an 11-point advance from last month as all grains and apples were up seasonally. Hay registered a drop of 20 cents a ton, much less than the usual decline at a time when cattle may be placed on pasture.

Livestock Declines
The livestock and livestock products index showed a decline of three points which was moderated by increases in the average prices received for most meat animals.

Hogs and cattle were up 90 cents per hundred pounds live-weight and calves were up an average of \$1.30 a hundred lbs.

Wholesale milk registered a 15-cent decline per hundred lbs which is less than the usual April-May drop, the Department said. Chickens were down 2 per cent and eggs declined 7 per cent for an average return of 42 cents a dozen to the farmer.

The Philippines are named as the site for an atomic center.

Have an enclosed play area for small children.

which were approved by more than three-fourths of the producers supplying the market.
