

Wheat Referendum Friday July 20

Friday, July 20, is the date when growers will determine how they want to market their 1957 wheat crop. Edward J. Fleming, Sr., Chairman of the Pennsylvania Agricultural Stabilization and Conservation Committee, reminded farmers today.

Farmers who will harvest more than 15 acres of wheat as grain on a farm in 1957 are eligible to cast ballots in the wheat quota referendum. Polling places will be set up in convenient locations in the county, and wheat growers will be notified where they may vote.

A two-thirds favorable vote

will mean that marketing quotas and penalties on excess wheat will be in effect for the 1957 wheat crop. Under quotas, too, price support to growers in the commercial area who comply with their wheat acreage allotments will be at the full level available—between 75 and 90 percent of parity.

If more than one-third of the growers voting disapprove quotas, the quotas will not be in effect, and the available price support on the 1957 wheat crop to those who comply with farm wheat acreage allotments will be at a level

of 50 per cent of parity.

When a marketing quota program is in effect, the excess wheat of a grower who does not comply with his farm acreage allotment and who has more than 15 acres of wheat for harvest as grain on the farm will be subject to a marketing quota penalty. This penalty will be equal to 45 percent of the May 1, 1957 parity price for wheat.

Chairman Fleming emphasized that the vote is on wheat marketing quotas and not wheat allotments. Whether or not the vote is favorable on the quotas, acreage allotments will be in effect for the 1957 wheat crop.

Marketing quotas have been approved by growers in referendums for the past three wheat crops. Last year, 77.3 percent of the growers voting favored quotas for the 1956 crop.

Wheat Vote To Decide Vital Questions

How wheat farmers vote in the July 20 referendum on wheat marketing quotas will actually affect only two parts of the 1957 wheat program, according to Edward J. Fleming, Sr., Chairman of the Pennsylvania Agricultural Stabilization and Conservation Committee. Whether or not quotas are approved, acreage allotments will remain in effect for the crop, the chairman declared.

The two points at issue are (1) whether marketing quotas shall be in effect, with penalties on "excess" wheat from farms (with more than 15 acres of wheat harvested as grain) not in compliance with the acreage allotment, and (2) the level of price support available to those who comply with their farm acreage allotments.

If quotas are approved by at least two-thirds of those who vote in the referendum, the quotas and penalties for excess production will be in effect, and price support on the crop will be available at a level between 75 and 90 percent of parity to those who comply with the farm wheat allotment.

If more than one-third of the voters disapprove the quotas, there will be no marketing quotas and no penalties for excess production, and the available price support will drop to 50 percent of parity, as provided by law.

Whether or not quotas are in effect, acreage allotments will remain in effect for the 1957 wheat crop.

Chairman Fleming explained that wheat marketing quotas and acreage allotments operate only in commercial wheat States, including Pennsylvania. Since the quotas affect only those growers in the commercial area who will have more than 15 acres of wheat for harvest as grain on a farm in 1957, these growers are the only ones eligible to vote in the referendum.

EMPTY BAG

Empty the bag of the vacuum cleaner often. Doris L. Snook, Penn State extension home management specialist, says when the bag becomes too full of dirt, the cleaner cannot work well.

LIGHT REFLECTS

It's a good idea to have white or light-colored lining in lamp shades to help reflect light, says Bonnie Dale Sansom, Penn State home furnishings extension specialist.

LAMB SLICES IN SAUCE

Its delicate flavor makes a roast leg of lamb a fitting meat suggestion for early springtime dinners. And the sauce for the lamb should sparkle with the arrival of spring, too.

Here is a recipe for a fresh mint and fruit sauce in which slices of cooked lamb are heated. It is sweet and spicy and blends well with the flavor of the meat.

Tomatoes Along River

Yields of tomatoes from fields planted by members of the Washington Boro Tomato Growers' Association are most promising. Here the early variety on the Henry Heisey farm south of Washington Boro, is supported by tobacco lath. Stalks are laden with green tomatoes and picking will start around July 1. It's Summer TRACTOR Trade-In Time!

Now's the Time to Trade FOR A NEW JOHN DEERE TRACTOR

We're in a trading mood! If you act now, we'll offer you a top price for your present tractor on a new John Deere.

Here's your big opportunity to own a modern John Deere Tractor—at substantial savings—and enjoy easier, more profitable farming this year and for years to come.

We have just the tractor you need and we'll gladly demonstrate its unmatched lugging power, economy, and ease of handling right on your farm—and make you a real money-saving proposition. Phone us or drop in soon.

If you wish, your purchase can be arranged on convenient terms through the John Deere Credit Plan.

KILLS FLIES

LETHALAIRE

A SUPER-POWERED AEROSOL ESPECIALLY DESIGNED FOR THE DAIRY INDUSTRY

D-200

The new insecticide that's amazingly effective, economical, safe, easy to use, fast and clean. Kills flies, even the resistant ones, and other insects that plague the dairy farm. Ask to see it demonstrated.

MFD. BY VIRGINIA SMELTING CO., WEST NORFOLK, VA.

SAFEST—SUREST—MOST ECONOMICAL WAY TO CONTROL RESISTANT FLIES

SAFE D 200 Bombs can be used safely where food and milk products are processed and handled. D-200 does not harm warm-blooded animals. It is U. S. D. A. approved—contains no inflammable solvents leaves no messy residue.

FAST AND CONVENIENT D-200 Bombs have extremely fast knock-down and kill—particularly important at the critical milking time, when you want your barn fly-free.

Ask For Free Demonstration

ECONOMICAL One D-200 Bomb will treat an average 40-cows barn about fifty times. One bomb is equivalent of 10-12 gallons of ordinary fly spray. Makes sanitation easy and cheap. No spray guns or machines to clean and repair.

NEW! NOW AVAILABLE
20 oz. LETHALAIRE BANTAM HI-POWERED AEROSOL—NON-INFLAMMABLE and NON-TOXIC—SAFE TO USE WHERE FOOD IS PROCESSED OR HANDLED. PRICE 2.75
