

**IT'S A SHAME**

"I'm sorry, madam," said the attendant at the movie, "but you can't take the dog into the theatre."

"How absurd," protested the woman. "What harm can pictures do a little dog like this?"

Spacious feed hopper. Holds 86 lbs of feed. Feed cows with turn of a handle. Dust tight overhead feed chutes enable you to feed quickly. All equipment is in 4-step area.

**Snow Fence, Autumn Trees**

Snow fences are being erected along Lancaster County highways as winter forecasts become more varied. Some predict a long, cold, snowy winter; some predict one that will be mild. The snow fences and trees whose leaves carry the tones of autumn add a seasonal note to Lancaster farming today. (Lancaster Farming Staff Photo).

**Careless Shooting  
Might Cost License**

So-called hunting gun accidents and flagrant disregard for the law have caused many persons to lose their Pennsylvania hunting privilege for a number of years.

At referees' hearings conducted by authorized Game Commission officials, it has been evident that many casualties were due to the careless or negligent handling of firearms.

Most revocations are for one to three years duration, dependent on the seriousness of the violation committed. Many of the license denials are for out-of-season game killing. Some of them are misdemeanor cases—shooting at, wounding or killing a human in mistake for game.

**YOUNG MAN WITH A FUTURE**

"Jones," remarked a neighbor, "I understand that boy of yours is learning a trade. Do you think he'll work at it?"

"No," was the candid reply. "I don't think he will. He's just learning it so that when he is idle he will be able to tell people what kind of work he is out of."

**Apple Week in  
State Extends  
Oct. 25-Nov. 3**

HARRISBURG—In spite of a reduced crop, Pennsylvania commercial apple growers will see that consumer suppliers of the "King of Fruits" will be available for observance of National Apple Week, October 25 through November 3, the State Department of Agriculture said today. Picking of winter apples is well underway and is expected to peak late this month, observers said.

Production estimates released today show that the 1956 crop of Pennsylvania apples as of Oct. 1 should total 4,370,000 bushels. This is 33 per cent below the 1955 output of 6,500,000 bushels due to killing frosts at blossoming time last May.

Late season apples gained additional size during September and as harvesting approached peak volume the production estimates were increased, the Department said.

Apple production in the southeast most nearly approached 1955 levels and was followed by the Adams - Franklin - York area. Apples in all areas have sized well, show good quality and color.

Processing plants were active at the time of the Pennsylvania Crop Reporting Service survey. Some MacIntosh and Staymans were going into storage. Hail on September 17 damaged some fruit in Berks County. In Lehigh County the late peach harvest delayed apple picking.

In the Erie County grape belt fears were expressed that a goodly portion of the important Concord crop would not ripen due to prolonged cool weather. Ripening was three to four weeks later than in 1955. Total production is estimated at 26,200 tons, 2,200 more than last year.

Pennsylvania's each harvest reached peak volume the second week in September. During the harvest season peaches moved rapidly in response to good demand. Some shipments were made to Canada from the Adams Franklin-York fruit belt. The final 1956 estimate of production at 2,340,000 bushels is 19 per cent below the 1955 crop of 2,900,000 bushels.
