

For the Farm Wife and Family

(Continued from page eight)

1/4 cup water
1/2 teaspoon salt
1/2 teaspoon Worcestershire sauce
5 tablespoons mayonnaise
Paprika

Cook rice as directed in method above.

Pour the milk into a saucepan. Place over a very low heat. Add the cheese. Allow to heat, stirring occasionally until the cheese melts. Keep the heat low. Do not allow to boil.

After the rice cooks, stir in the peas, Tabasco sauce and three-fourth cup water. Spread in a greased shallow baking dish about 12 x 7 1/2 x 2 inches.

Cut the eggs in half lengthwise. Remove the yolks. Add the one-half teaspoon salt, Worcestershire sauce and mayonnaise. Mash with a fork until the mix-

ture is smooth. Refill the whites smoothing over the tops. Place the egg whites over the rice mixture. Cover the eggs and rice with the cheese-milk mixture. Sprinkle lightly with paprika. Bake in a pre-heated 350 degree oven 25 to 30 minutes or until the cheese browns and most of the water is absorbed. Serve immediately. This recipe makes six generous meal-sized servings.

A menu suggestion using the above casserole — serve with a tossed salad with your favorite dressing and as a dessert — deep-dish apple pie.

Plan an oven meal around this new and delicious apple dessert. The apples bake at 350 degrees for about an hour, so time them to come out just as the meal is on the table. They are so delicious served warm with cold milk or cream. You can have the apples prepared ahead of time, all ready to put into the oven.

BAKED APPLE HALVES WITH RAISINS

1 1/2 cups water
1 teaspoon salt
3/4 cup uncooked white rice

RED PIMIENTOS and sweet pickle relish are the flavor boosters in this salmon main dish. The quickly made salmon sauce looks so tasty over white rice. The hard-cooked egg garnish is an easy trick, and with colorful paprika you have a magnificent main dish beautiful enough for a real fancy meal. (R.C.S., Inc. Photo)

TERMITES

OF TERMITES

A The reproductives are winged insects (2 pairs of wings of equal size) which swarm in great numbers in early spring.

B Immediately after swarming the insects kick off their wings, mate and try to get back into the soil.

C It is cheaper to have the soil treated against termites before the house is built. If you missed out on this, it is cheaper to have the house treated this year than to wait until next year. Termites eat while you sleep and they fancy the timbers of your house as much as an old fence post, just as long as it is good, tasty — CELLULOSE

Your property may be endangered by termites right now.

Our guaranteed termite protection service is available for all properties: old, new, or in construction.
